

Tradenix – OUT Declaration Step-by-Step Procedure

Declarations → Outward (OUT)

1. Page Overview

The Outward (OUT) declaration workflow is used by authorized users to create, review, save, validate, and submit outward TradeNet declarations. The declaration is completed across a sequence of tabs: Shipment Info, Transport Info, Party Info, Invoice, Items, CPC, and Summary.

2. Navigation

Expected navigation path:

Declarations → Outward (OUT) → + NEW DECLARATION

3. Declaration Workflow Tabs

Tab	Purpose	Navigation
Shipment Info (S)	Declaration type, cargo type, transport mode, release/receipt locations, previous permit, certificate of origin, and other shipment-level information.	First tab / use NEXT to continue.
Transport Info (T)	Cargo details, inward and outward transport means, vessel information, ports, voyage details, and container information.	PREVIOUS returns to Shipment Info; NEXT opens Party Info.
Party Info (P)	Importer, inward/outward carrier, freight forwarder, declaring agent, exporter, consignee, end user, and manufacturer details where applicable.	PREVIOUS returns to Transport Info; NEXT opens Invoice.
Invoice (V)	Invoice number/date, supplier or manufacturer party, term type, currencies, charges, CIF, duties, tax, and GST.	PREVIOUS returns to Party Info; NEXT opens Items.
Items (I)	Item references, HS Code, description, country of origin, quantity/UOM, values, CASC, certificate-of-origin details, shipping marks, tariff and related information.	PREVIOUS returns to Invoice; NEXT opens CPC.
CPC (C)	CPC-related options such as AEO, CWC, SEASTORE, STS, International Permit Exchange, CNB, and Deferred Printing of CO.	PREVIOUS returns to Items; NEXT opens Summary.
Summary (Y)	Final totals, CIF/FOB value, remarks, declaration statement, validation, draft save, and submission.	PREVIOUS returns to CPC; NEXT is not applicable at the final tab.

4. Navigation Button Notes

Control	Action	Important Note
PREVIOUS	Moves to the immediately preceding declaration tab.	Use when earlier information must be reviewed or corrected. It does not submit the declaration.
NEXT	Moves to the immediately following declaration tab.	Complete the mandatory fields required by the current workflow before

Control	Action	Important Note
		proceeding. Entered data should remain available while navigating.
SAVE DRAFT	Stores the current OUT declaration without final submission.	A successful save is confirmed by the Draft Saved notification. Saving a draft is not the same as submitting the declaration.
SUBMIT DECLARATION	Runs final validation and submits the OUT declaration when validation succeeds.	Use only after reviewing the Summary and confirming the declaration statement. Validation or submission notifications indicate the result.
EXIT DECLARATION	Leaves the declaration entry/edit page.	Use only after saving any information that must be retained.

5. Validation Requirements

- All fields marked with * should be treated as mandatory.
- Declaration Type is mandatory. If it is missing, the application displays a Validation Error instructing the user to select a Declaration Type before saving or processing.
- Mandatory declaration information should not accept blank or whitespace-only values where text input is required.
- Invalid, incomplete, or inconsistent declaration data should prevent successful final submission.
- If required data is missing, the application can display a Validation Failed notification and a detailed validation panel identifying missing or invalid fields.
- The declaration statement “I/We declare that all the particulars in this Application are true and correct.” must be confirmed before final submission when required by the application.
- SAVE DRAFT stores the current declaration without final submission and displays a Draft Saved confirmation when successful.
- Saving a draft does not mean the declaration passed final submission validation; unresolved mandatory fields must still be corrected before submission.
- SUBMIT DECLARATION performs final validation before the declaration is submitted.
- If validation fails, the declaration remains available for correction and should not be treated as successfully submitted.
- After successful validation and submission, confirmation notifications are displayed and the declaration appears in the OUT Declaration Management list with the appropriate status.

6. Suggested Outward Declaration Management Flow

1. Open Declarations → Outward (OUT).
2. Review the existing OUT declaration list or use the available filters to locate a declaration.
3. Select + NEW DECLARATION to begin a new outward declaration.
4. Complete Shipment Info, including Declaration Type, Cargo Type, transport mode, Release Location, Receipt Location, and applicable Certificate of Origin information.
5. Use NEXT to proceed through Transport Info, Party Info, Invoice, Items, CPC, and Summary. Use PREVIOUS to return to an earlier tab when information must be reviewed or corrected.
6. Complete all transport, party, invoice, item, CPC, and other applicable declaration information.
7. Use SAVE DRAFT when the declaration must be stored without final submission and verify the Draft Saved confirmation.
8. On Summary, review item totals, invoice values, Total CIF/FOB Value, transport summary, remarks, and the declaration statement.
9. Select SUBMIT DECLARATION only after all mandatory information is complete and the declaration statement has been confirmed.

- 10.** If validation fails, review the toast message and detailed validation panel, correct the identified fields, and submit again.
- 11.** After successful validation and submission, verify the success notifications and confirm the declaration appears in OUT Declaration Management with the resulting status.

Appendix A – UI Reference

The following screenshots show the outward declaration workflow, including declaration creation, validation failures, completed declaration tabs, draft saving, and successful submission.

Step 1: Open OUT Declaration Management

From the left navigation menu, expand Declarations and select Outward (OUT). The OUT Declaration Management page displays existing outward declarations, filters, statuses, row actions, and declaration-level controls. Select + NEW DECLARATION to begin a new OUT declaration.

Note: The management page also provides controls such as Refresh, OUTUPD, Custom Column, Status List, Download Template, and Excel Upload.

Figure 1. OUT Declaration Management - Add New Declaration

Step 2: Start a New OUT Declaration

The system opens the OUT declaration entry page at Shipment Info (S). Complete the mandatory declaration fields, including Declaration Type, Cargo Type, Outward Transport Mode, Release Location, and Receipt Location, together with other shipment information required for the declaration.

Note: Select NEXT to continue after the required information has been completed. SAVE DRAFT stores the current declaration without final submission.

The screenshot displays the Tradenix web application interface for creating a new OUT Declaration. The browser address bar shows the URL: `ec2-18-141-176-151.ap-southeast-1.compute.amazonaws.com/declarations/out/edit/9715`. The Tradenix logo is in the top left corner. The page title is "OUT Declarations / Edit Declaration". A red button labeled "EXIT DECLARATION" is in the top right corner.

The main content area is divided into several sections:

- Job Info (Left Sidebar):** Contains metadata for the declaration, including Message Reference (TDX2609160028), URN ID (202535359H), Sequence Number (1027), Declarant Name (NAMASIVAYAM GUNESPARAN), Declarant Code (S856279U), Declarant Phone (81189066), Created At (16-09-2026 19:07), Created By (kalai), Updated At (16-09-2026 19:07), and Updated By (kalai).
- Shipment Info (S) Tab:** The active tab, showing the following fields:
 - Declaration Info:** Declaration Type (dropdown), Cargo Type (dropdown), Outward Transport Mode (dropdown), Release Location (dropdown), Receipt Location (dropdown), and Storage Location (dropdown).
 - Prev Permit Number:** Previous Permit Number (text field).
 - Checks:** BO Indicator (dropdown), Blanket start Date (DD/MM/YYYY date field), and Additional Recipients (checkbox).
 - Certificate of Origin:** CO Type (dropdown), License (checkbox), and Document (checkbox).

At the bottom right, there are navigation buttons: "ACK", "PREVIOUS", "NEXT", and "SAVE DRAFT". A note below these buttons says "Go to Settings to activate Windows."

Figure 2. New OUT Declaration - Shipment Info

Step 3: Review Validation Error for Missing Declaration Type

If Declaration Type is not selected, the system displays a Validation Error message stating that Declaration Type is required. The declaration must be corrected before the relevant save or submission action can complete successfully.

Note: The screenshot shows the Summary tab with the red Validation Error notification at the top-right.

The screenshot displays the Tradenix web application interface for editing an OUT Declaration. A red notification box in the top right corner states: "Validation Error Declaration Type is required. Please select a Declaration Type before saving." The interface includes a sidebar with "Job Info" and a main content area with tabs for "Summary", "Remarks", and "Declaration Summary". The "Summary" tab is active, showing fields for "Number of Items" (1), "Sum of Invoice Amount" (0.00), "Sum of Item Amount" (0.00), "Total Invoice CIF Value" (0.00), and "Total CIF/FOB Value" (0.00). The "Remarks" tab shows three text areas for "Remarks", "Internal Remarks", and "Customer Remarks". The "Declaration Summary" tab shows a table with columns for "Total Package", "Total Gross Weight", "Inward Transport", "Outward Transport", "Cross Reference ID", and "Shipment ID". The table contains one row with values: "0 PK", "0.000", "--", "--", "", and "". Below the table is a checkbox labeled "I/We declare that all the particulars in this Application are true and correct." At the bottom right, there are buttons for "PREVIOUS", "NEXT", "SAVE DRAFT", and "SUBMIT DECLARATION".

Figure 3. Validation Error - Declaration Type Required

Step 4: Review Draft Save and Validation Failed Notifications

The application can confirm that the draft was saved while also indicating that required fields are still incomplete. A green Draft Saved notification confirms storage of the draft, while the red Validation Failed notification indicates that the declaration is not ready for final submission.

Note: Saving a draft is independent from successful final submission validation.

The screenshot displays the Tradenix web application interface for editing an OUT Declaration. The browser address bar shows the URL: `ec2-18-141-176-151.ap-southeast-1.compute.amazonaws.com/declarations/out/edit/9715`. The application header includes the Tradenix logo and navigation tabs: Shipment Info (S), Transport Info (T), Party Info (P), Invoice (V), Items (I), CPC (C), and Summary (Y). The Summary tab is currently selected.

On the left, the 'Job Info' sidebar displays details for the declaration, including Message Reference (TDX2609160028), URN ID (202535359H), Sequence Number (1027), Declarant Name (NAMASIVAYAM GUNESPARAN), Declarant Code (58562791J), Declarant Phone (81189066), Created At (16-09-2026 19:07), Created By (kalai), Updated At (16-09-2026 19:07), and Updated By (kalai).

The main content area is divided into two sections: 'Summary' and 'Remarks'. The 'Summary' section shows the following values:

Field	Value
Number of Items	1
Sum of Invoice Amount	0.00
Sum of Item Amount	0.00
Total Invoice CIF Value	0.00
Total CIF/FOB Value *	0.00

The 'Remarks' section contains three text input fields for 'Remarks', 'Internal Remarks', and 'Customer Remarks', each with a placeholder 'Enter remark...'. Below these fields is a 'Declaration Summary' table:

Total Package	Total Gross Weight	Inward Transport	Outward Transport	Cross Reference ID	Shipment ID
0 PK	0.000	--	--		

Below the table, there is a checkbox labeled 'We declare that all the particulars in this Application are true and correct.' which is currently unchecked.

At the bottom right, there are four buttons: 'PREVIOUS', 'NEXT', 'SAVE DRAFT', and 'SUBMIT DECLARATION'. Below these buttons, a message reads: 'Go to Settings to activate Windows.'

Two notifications are displayed in the top right corner:

- Draft Saved:** Your OUT declaration draft has been saved successfully.
- Validation Failed:** Please fill in all required fields.

At the bottom left, a red notification bar indicates 'Validation Failed:'.

Figure 4. Draft Saved and Validation Failed Notifications

Step 5: Review Detailed Validation Failures

When final validation fails, review the detailed validation panel displayed below the Summary section. The panel lists missing or invalid information, such as required declaration/cargo fields, transport mode, departure date, discharge port, or final destination country.

Note: Correct every identified error before attempting SUBMIT DECLARATION again.

The screenshot displays the Tradenix web application interface for an OUT Declaration. The browser address bar shows the URL: `ec2-18-141-176-151.ap-southeast-1.compute.amazonaws.com/declarations/out/edit/9715`. The page is titled "Tradenix" and includes a sidebar with user information and a main content area.

Declaration Summary:

Total Package	Total Gross Weight	Inward Transport	Outward Transport	Cross Reference ID	Shipment ID
0 PK	0.000	--	--		

☐ We declare that all the particulars in this Application are true and correct.

Validation Failed:

Please fill in all required fields before submitting:

- Please fill in all required fields. Invalid fields: header.declarationIndicator, cargo.cargoPackingType, cargo.releaseLocation.locationCode, cargo.releaseLocation.locationName, cargo.receiptLocation.locationCode
- Outward Transport Mode is required
- Outward Departure Date is required
- Discharge Port is required
- Final Destination Country is required

Buttons at the bottom right: [PREVIOUS](#), [NEXT](#), [SAVE DRAFT](#), [SUBMIT DECLARATION](#).

Windows watermark: Activate Windows. Go to Settings to activate Windows.

Figure 5. Detailed Validation Failure Messages

Step 6: Complete Shipment Information

Enter or verify the Shipment Info values for the OUT declaration. The completed example includes Declaration Type, Cargo Type, Inward Transport Mode, Outward Transport Mode, Release Location, Receipt Location, and Certificate of Origin details where applicable.

Note: Additional shipment controls such as previous permit number, checks, recipients, license, and document may be completed depending on the declaration scenario.

The screenshot displays the Tradenix web application interface for editing an OUT declaration. The browser address bar shows the URL: `ec2-18-141-176-151.ap-southeast-1.compute.amazonaws.com/declarations/out/edit/9716`. The interface includes a sidebar with 'Job Info' and a main content area with tabs for 'Shipment Info (S)', 'Transport Info (T)', 'Party Info (P)', 'Invoice (V)', 'Items (I)', 'CPC (C)', and 'Summary (Y)'. The 'Shipment Info' tab is active, showing the following sections:

- Declaration Info:**
 - Declaration Type: `40 - DGT`
 - Cargo Type: `5 - Other non-containerized`
 - Inward Transport Mode: `1 - Sea`
 - Outward Transport Mode: `1 - Sea`
 - Release Location: `O`
 - Receipt Location: `PPZ`
 - Storage Location: `PASIR PANJANG FTZ`
- Prev Permit Number:**
 - Previous Permit Number: (empty field)
- Checks:**
 - RO Indicator: `Select`
 - Blanket start Date: `DD/MM/YYYY`
 - ☐ Additional Recipients
- Certificate of Origin:**
 - CO Type: `NH - Application for non-textile products (Cc)`
 - Certificate Detail #1 - Type: `29 - Asean-Australia-New Z`
 - Certificate Detail #2 - Type: (empty field)
 - GSP Donor Country: (empty field)
 - Preference Content Percent: (empty field)
 - CERTIFICATE ADDITIONAL INFO:**
 - Additional Info #1: (empty field)
 - Additional Info #2: (empty field)
 - Additional Info #3: (empty field)
 - Additional Info #4: (empty field)
 - Additional Info #5: (empty field)
 - TRANSPORT DETAILS:**
 - Transport Detail #1: (empty field)
 - Transport Detail #2: (empty field)
 - Transport Detail #3: (empty field)
 - Transport Detail #4: (empty field)
 - Transport Detail #5: (empty field)
 - ☐ License
 - ☐ Document

The sidebar 'Job Info' contains the following details:

- Message Reference: `TDX2609160029`
- URN ID: `202535359H`
- Sequence Number: `1028`
- Declarant Name: `NUMASUVAYAM GUNESPARAN`
- Declarant Code: `S856279U`
- Declarant Phone: `81189066`

- Created By: `katal`
- Updated At: `16-09-2026 19:09`
- Updated By: `katal`

An 'EXIT DECLARATION' button is located in the top right corner of the main content area.

Figure 6. Completed Shipment Information

Step 7: Complete Transport Information

Select Transport Info (T) or use NEXT from Shipment Info. Enter cargo details such as Total Package, package UOM, Gross Weight and UOM. Complete inward and outward transport means, voyage details, loading/discharge ports, country of final destination, additional vessel information, and container details when applicable.

Note: PREVIOUS returns to Shipment Info. NEXT proceeds to Party Info.

The screenshot displays the Tradenix web application interface for completing transport information. The browser address bar shows the URL: `ec2-18-141-176-151.ap-southeast-1.compute.amazonaws.com/declarations/out/edit/9716`. The application header includes the Tradenix logo and a user profile icon. The main navigation bar shows tabs for Shipment Info (S), Transport Info (T), Party Info (P), Invoice (V), Items (I), CPC (C), and Summary (Y). The Transport Info (T) tab is active.

Figure 7. Transport Information

Step 8: Complete Party Information

Select Party Info (P) or use NEXT from Transport Info. Enter or verify the parties involved in the outward declaration, including Importer, Inward Carrier, Freight Forwarder, Outward Carrier, Declaring Agent, Exporter, Consignee, End User, and Manufacturer where applicable. Verify UEN and address information before proceeding.

Note: PREVIOUS returns to Transport Info. NEXT proceeds to Invoice.

The screenshot shows the 'Party Info' tab in the Tradenix system. The form is divided into several sections, each for a different party involved in the declaration. Each section includes a search bar, a dropdown menu, and a 'Country Code' field. The 'Country Code' field is set to 'SG' for all parties. The 'UEN' field is also present for each party.

Party Name	Name	UEN
Importer	ARIEL GROUP COMPANY PTE LTD ARIEL GROUP COMPANY PTE LTD	2000000000
Inward Carrier	AIR SHIPPING PTE LTD AIR SHIPPING PTE LTD	2000000000

Step 10: Complete Item Information

Select Items (I) or use NEXT from Invoice. Add the required item data, including inward/outward HAWB or shipment references where applicable, HS Code, description, brand, country of origin, quantity, UOM, item value, and related CASC, certificate-of-origin, shipping mark, tariff, or GST information.

Note: PREVIOUS returns to Invoice. NEXT proceeds to CPC.

The screenshot displays the 'Add Declaration' form in the Tradenix system. The form is divided into several sections:

- Job Info:** Includes fields for Message Reference, Job ID, and various contact details.
- Item Details:** Contains fields for Item ID, Inward/Outward HAWB, HS Code, Description, and Date Type.
- CASC Details:** Includes fields for Certificate of Origin (COO), Certificate Quantity, and Certificate Item Value.
- Item Quantity & Value:** Contains fields for Item Quantity, UOM, and Item Value.
- Items Summary:** A table at the bottom showing the summary of items added.

The 'Items Summary' table has the following data:

ITEM ID	HS CODE	DESCRIPTION	COO	QUANTITY	UOM	CURRENCY	ITEM VALUE	GST
CF	843070	AIR CONDITIONERS USED FOR PERSONS IN MOTOR VEHICLES OF COOLING CAPACITY NOT OVER 20.38kW (NINE)	SG	5	NONE	SGD	32000.00	0.00

Figure 10. Item Information

Step 11: Complete CPC Information

Select CPC (C) or use NEXT from Items. Choose the CPC-related options applicable to the declaration, such as AEO, CWC, SEASTORE, STS, STS & CWC, International Permit Exchange, CNB, or Deferred Printing of CO. Where AEO is selected, enter the required process codes.

Note: PREVIOUS returns to Items. NEXT proceeds to Summary.

Figure 11. CPC Information

Step 12: Review the Declaration Summary and Save Draft

Select Summary (Y) or use NEXT from CPC. Review the number of items, invoice amount, item amount, Total Invoice CIF Value, Total CIF/FOB Value, package and gross weight summary, inward/outward transport, remarks, and declaration statement. Use SAVE DRAFT when the declaration must be stored without final submission.

Note: The green Draft Saved notification confirms that the OUT declaration draft was saved successfully. Confirm the declaration statement before final submission when required.

The screenshot displays the Tradenix web application interface for editing an OUT Declaration. A green notification box in the top right corner states: "Draft Saved. Your OUT declaration draft has been saved successfully." The main content area is divided into several sections:

- Job Info:** A sidebar on the left containing details such as Message Reference (TDX2609160029), URN ID (202535359H), Sequence Number (1028), Declarant Name (NAMASIVAYAM GUNESPARAN), Declarant Code (S8562791J), Declarant Phone (81189066), Created At (16-09-2026 19:09), Created By (kalai), Updated At (16-09-2026 19:09), and Updated By (kalai).
- Summary:** A central section showing key values: Number of Items (1), Sum of Invoice Amount (32000.00 SGD), Sum of Item Amount (32000.00 SGD), Total Invoice CIF Value (32000.00), and Total CIF/FOB Value (32000.00, highlighted in yellow).
- Remarks:** A section with three text areas for Remarks (containing "ADATA TEST CASE 1"), Internal Remarks, and Customer Remarks.
- Declaration Summary:** A table at the bottom summarizing the declaration details:

Total Package	Total Gross Weight	Inward Transport	Outward Transport	Cross Reference ID	Shipment ID
5 BOX	1 TNE	Sea 20260909	Sea 20260909		

At the bottom of the Declaration Summary section, there is a checkbox labeled "I/We declare that all the particulars in this Application are true and correct." which is checked. The bottom right corner features navigation buttons: "PREVIOUS", "NEXT", "SAVE DRAFT", and "SUBMIT DECLARATION".

Figure 12. Declaration Summary - Draft Saved

Step 13: Validate and Submit the OUT Declaration

After all mandatory information is complete, select SUBMIT DECLARATION from the Summary page. The system performs final validation. When validation succeeds, the application displays confirmation messages and returns to the OUT Declaration Management list.

Note: The example shows Draft Saved, Validation Passed, and Declaration Submitted notifications. The submitted declaration appears in the list with status SUB.

The screenshot displays the Tradenix OUT Declaration Management interface. The left sidebar contains navigation links: Dashboard, Status List, Declarations, and Reports. The main header shows 'OUT Declarations' and 'OUT Declaration Management' with subtext 'Manage Outward Payment TradeNet declarations'. Above the table are buttons for REFRESH, OUTUPD, and CUSTOM COLUMN, along with a STATUS filter dropdown set to 'All Status'. Three green notification boxes are overlaid on the right side of the interface:

- Draft Saved:** Your OUT declaration draft has been saved successfully.
- Validation Passed:** Your declaration is ready for submission.
- Declaration Submitted:** Your OUT declaration has been submitted successfully.

The main table lists declarations with the following columns: Job ID, Message Ref, Declaration Type, Message Type, Seq No, Created By, Status, Permit No., and Created. The table contains 12 rows of data. The first row (Job ID 9716) has a status of 'SUB' (Submitted). The other rows have statuses of 'DRF' (Draft) or 'PMT' (Payment). The bottom of the interface shows 'Declarations per page 10' and '1 - 10 of 1233 Declarations'.

Job ID	Message Ref	Declaration Type	Message Type	Seq No	Created By	Status	Permit No.	Created

Figure 13. Validation Passed and Declaration Submitted

Step 14: Verify the Submitted Declaration in Management

Confirm that the submitted declaration appears in OUT Declaration Management with the expected Message Ref, Declaration Type, Message Type, sequence information, creator, and resulting status. Use the available row actions according to the user's permissions and the declaration status.

Note: A successfully submitted declaration is shown with status SUB in the example.

The screenshot displays the Tradenix OUT Declaration Management interface. The left sidebar contains navigation links for Dashboard, Status List, Declarations, and Reports. The main area shows a table of OUT Declarations with columns for Job ID, Message Ref, Declaration Type, Message Type, Seq No, Created By, Status, Permit No., and Created. The table lists several declarations, including one with status 'SUB' (Submitted). Three green notification boxes are overlaid on the right side of the interface, indicating successful actions: 'Draft Saved', 'Validation Passed', and 'Declaration Submitted'.

Job ID	Message Ref	Declaration Type	Message Type	Seq No	Created By	Status	Permit No.	Created	Updated	Message Ref	Message Type	Seq No	Created By	Status	Permit No.	Created	Updated	Message Ref	Message Type	Seq No	Created By	Status	Permit No.	Created	Updated	Message Ref	Message Type	Seq No	Created By	Status	Permit No.	Created	Updated
