

COO Declaration

1. Page Overview

The Certificate of Origin (COO) declaration workflow is used by authorized users to create, review, save, validate, and submit Certificate of Origin declarations. The workflow is completed across Header & Certificate, Transport Info, Party Info, Items, and Summary.

2. Navigation

Expected navigation path:

Declarations → Certificate of Origin (COO) → + NEW DECLARATION

3. Declaration Workflow Tabs

Tab	Purpose	Navigation
Header & Certificate (H)	Declaration information, outward transport mode, certificate type/details, copies, currency, and supporting certificate information.	First tab / use NEXT to continue.
Transport Info (T)	Outward transport means including flight/voyage details, departure date, discharge port, and country of final destination.	PREVIOUS returns to Header & Certificate; NEXT opens Party Info.
Party Info (P)	Freight Forwarder, Outward Carrier, Declaring Agent, Exporter, Consignee, Manufacturer, UEN, and address details.	PREVIOUS returns to Transport Info; NEXT opens Items.
Items (I)	HS Code, country of origin, description, quantity, value, invoice data, Certificate of Origin item details, and shipping marks.	PREVIOUS returns to Party Info; NEXT opens Summary.
Summary (S)	Final review, number of items, shipment ID, declaration statement, draft saving, validation, and final submission.	PREVIOUS returns to Items; NEXT is not applicable on the final tab.

4. Navigation Button Notes

Control	Action	Important Note
PREVIOUS	Moves to the immediately preceding COO declaration tab.	Use to review or correct earlier information. It does not submit the declaration.
NEXT	Moves to the immediately following COO declaration tab.	Complete mandatory fields required by the current stage before proceeding where validation is enforced.
SAVE DRAFT	Saves the current COO declaration without final submission.	A successful save is confirmed by a Draft Saved notification.
SUBMIT DECLARATION	Performs final validation and submits the COO declaration.	Use only after reviewing the Summary and confirming the

		declaration statement.
DRAFT COO	Downloads or generates the available draft COO document for the current declaration.	Availability depends on the current declaration state and system behavior.
COO DETAILS	Provides COO details when the function is enabled for the current declaration state.	The control may remain unavailable until applicable processing requirements are met.
EXIT DECLARATION	Leaves the declaration entry screen.	Save required work before exiting when necessary.

5. Validation Requirements

- All fields marked with * should be treated as mandatory.
- Mandatory declaration information should not accept blank or whitespace-only values where text input is required.
- The Declaration Indicator must be confirmed before final submission.
- Certificate Type and applicable certificate details must be completed as required by the declaration scenario.
- Outward Transport Mode and corresponding transport data must be completed.
- Required exporter and consignee information, including addresses, must be provided.
- Invalid, incomplete, or inconsistent data must prevent successful final submission.
- Validation messages should clearly identify the missing or invalid field or section.
- SAVE DRAFT saves the current declaration without final submission and should display a Draft Saved confirmation.
- SUBMIT DECLARATION performs final validation before submission.
- If validation fails, the declaration remains available for correction and is not treated as successfully submitted.
- After successful submission, the declaration should appear in COO Declaration Management with the appropriate status.

6. Suggested Certificate of Origin Declaration Flow

1. Open Declarations → Certificate of Origin (COO).
2. Review the existing COO declaration list or use the available filters to locate a declaration.
3. Select + NEW DECLARATION to create a new Certificate of Origin declaration.
4. Complete Header & Certificate information, including Outward Transport Mode, CO Type, certificate detail type(s), and other applicable certificate information.
5. Use NEXT to proceed through Transport Info, Party Info, Items, and Summary. Use PREVIOUS whenever earlier information must be reviewed or corrected.
6. Enter and verify outward transport details, parties, exporter/consignee data, item information, and Certificate of Origin item details.
7. Use SAVE DRAFT when the declaration must be stored without final submission and verify the Draft Saved confirmation.
8. On Summary, review the number of items and declaration indicator.

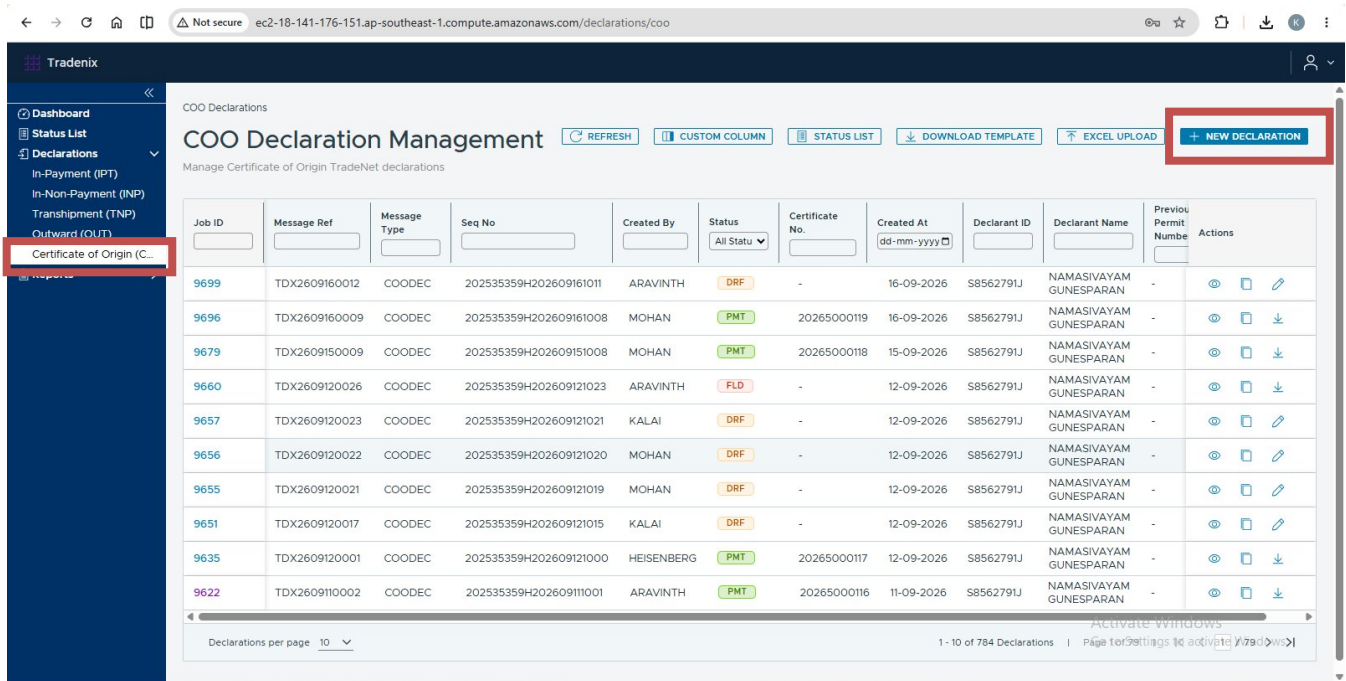

-
- 9.** Select SUBMIT DECLARATION only after confirming that all required information is complete and correct.
 - 10.** If validation fails, correct the fields listed in the validation message and submit again.
 - 11.** After successful submission, verify the confirmation notification and confirm that the declaration appears in COO Declaration Management with status SUB or the appropriate resulting status.

Appendix A – UI Reference

Step 1: Open COO Declaration Management

From the left navigation menu, expand Declarations and select Certificate of Origin (COO). The COO Declaration Management page displays existing declarations, filters, status information, certificate numbers, row actions, and declaration-level controls. Select + NEW DECLARATION to begin a new COO declaration.

Step 3: Review Validation Failure on Incomplete Declaration

If the user attempts final submission while mandatory information is incomplete, the system displays Validation Failed. The Summary also shows the declaration statement, which must be confirmed before successful submission. A draft may still be saved where allowed.

The screenshot shows the Tradenix web application interface for editing a COO Declaration. The browser address bar indicates the URL: `ec2-18-141-176-151.ap-southeast-1.compute.amazonaws.com/declarations/coo/edit/9717`.

Job Info Sidebar:

- Message Reference: TDX2609160030

Main Content Area:

- Summary:** Number of Items: 1. A note states: "Number of items is automatically calculated from the Items tab."
- Declaration Indicator:** Shipment ID: [Empty field]. A checkbox is followed by the text: "We declare that all particulars in this application are true and correct."

Navigation and Actions:

- Buttons: < PREVIOUS, NEXT >, SAVE DRAFT, SUBMIT DECLARATION.

Validation Failure Message (Bottom):

Validation Failed:
Please fill in all required fields before submitting.

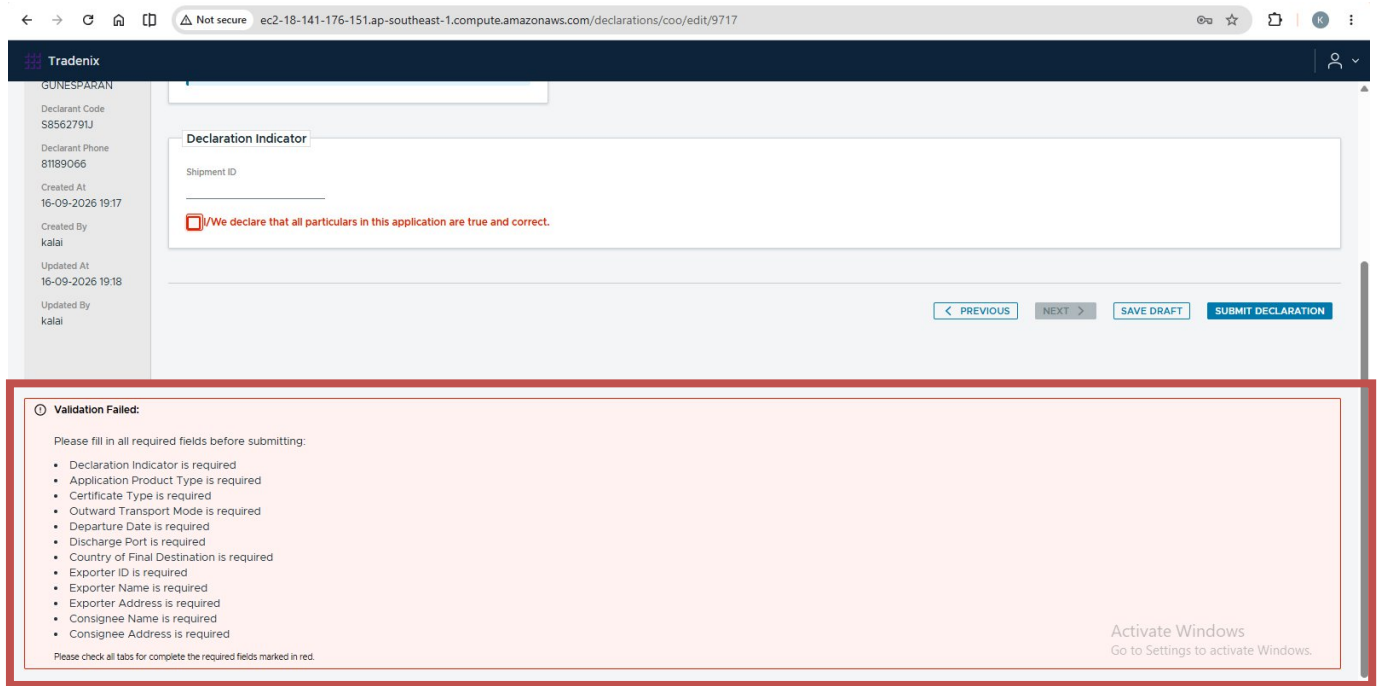

Notifications (Top Right):

- Draft Saved:** Your COO declaration draft has been saved successfully.
- Validation Failed:** Please correct the errors and try again.

Figure 3. Validation Failed - Summary

Step 4: Review Detailed Validation Messages

The detailed validation panel lists the missing required information that must be corrected before submission. The example identifies requirements such as Declaration Indicator, Application Product Type, Certificate Type, Outward Transport Mode, Departure Date, Discharge Port, Country of Final Destination, Exporter ID, Exporter Name, Exporter Address, Consignee Name, and Consignee Address.

The screenshot shows a web browser window with the URL `ec2-18-141-176-151.ap-southeast-1.compute.amazonaws.com/declarations/coo/edit/9717`. The page is titled "Tradenix" and displays a "Declaration Indicator" form. The form includes a "Shipment ID" field and a checkbox for "We declare that all particulars in this application are true and correct." Below the form, there are buttons for "PREVIOUS", "NEXT", "SAVE DRAFT", and "SUBMIT DECLARATION".

A red-bordered box highlights a "Validation Failed" message. The message states: "Please fill in all required fields before submitting:" and lists the following required fields:

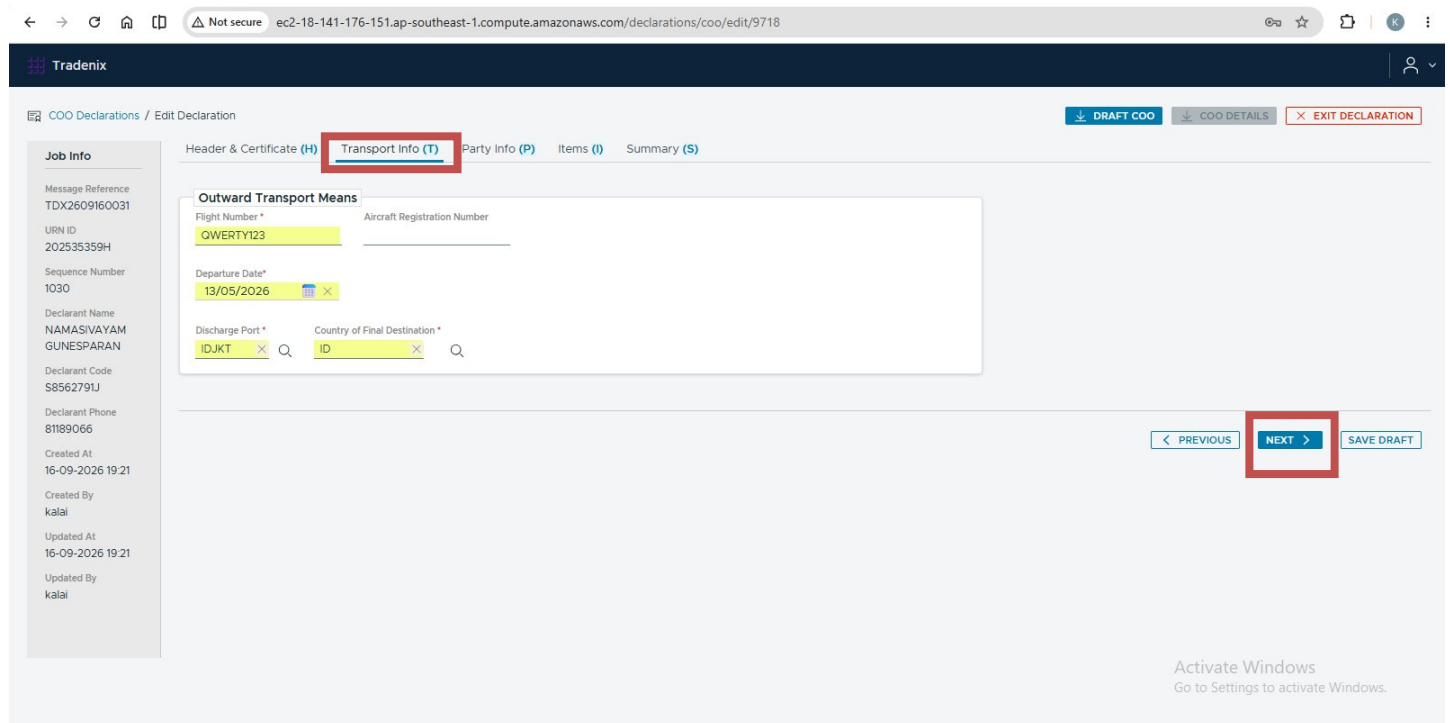

- Declaration Indicator is required
- Application Product Type is required
- Certificate Type is required
- Outward Transport Mode is required
- Departure Date is required
- Discharge Port is required
- Country of Final Destination is required
- Exporter ID is required
- Exporter Name is required
- Exporter Address is required
- Consignee Name is required
- Consignee Address is required

The message also includes a note: "Please check all tabs for complete the required fields marked in red." In the bottom right corner of the validation message box, there is a Windows watermark: "Activate Windows Go to Settings to activate Windows."

Figure 4. Detailed Validation Failed Message

Step 5: Complete Transport Information

Select Transport Info (T) or use NEXT from Header & Certificate. Enter the applicable outward transport information. The example includes Flight Number, Departure Date, Discharge Port, Country of Final Destination, and optional Aircraft Registration Number.

Figure 8. COO Declaration Summary

Step 9: Save the Declaration as Draft

Select SAVE DRAFT when the COO declaration must be saved without final submission. After a successful save, the system displays a Draft Saved notification confirming that the COO declaration draft has been saved successfully.

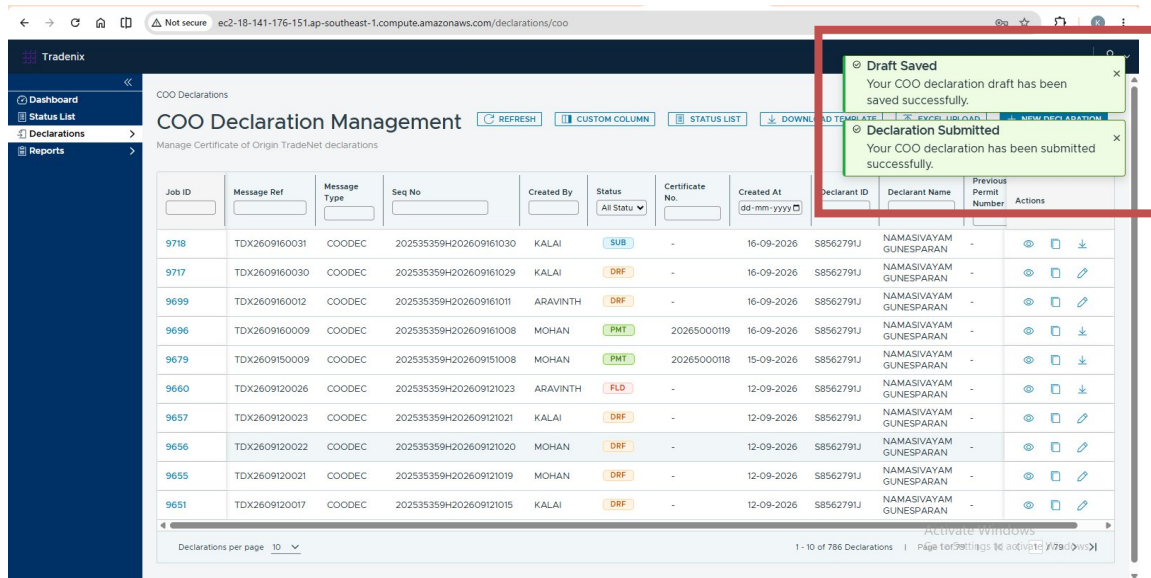

The screenshot shows the Tradenix web application interface for editing a COO declaration. The browser address bar indicates the URL: `ec2-18-141-176-151.ap-southeast-1.compute.amazonaws.com/declarations/coo/edit/9718`. The page title is "Tradenix". The breadcrumb navigation shows "COO Declarations / Edit Declaration". The main navigation tabs are "Header & Certificate (H)", "Transport Info (T)", "Party Info (P)", "Items (I)", and "Summary (S)". The "Summary" tab is active. On the left, the "Job Info" sidebar displays details: Message Reference (TDX2609160031), URN ID (202535359H), Sequence Number (1030), Declarant Name (NAMASIVAYAM GUNESPARAN), Declarant Code (S8562791J), Declarant Phone (81189066), Created At (16-09-2026 19:21), Created By (kalai), Updated At (16-09-2026 19:21), and Updated By (kalai). The main form area has a "Summary" section with "Number of Items" set to 1 and a note: "Number of items is automatically calculated from the Items tab." Below this is the "Declaration Indicator" section with a "Shipment ID" field and a checked checkbox: "I/We declare that all particulars in this application are true and correct." At the bottom right, there are four buttons: "< PREVIOUS", "NEXT >", "SAVE DRAFT", and "SUBMIT DECLARATION". The "SUBMIT DECLARATION" button is highlighted with a red box. A green notification box in the top right corner, also highlighted with a red box, says: "Draft Saved Your COO declaration draft has been saved successfully." At the bottom right, there is a footer: "Activate Windows Go to Settings to activate Windows."

Figure 9. COO Draft Saved Confirmation

Step 10: Validate and Submit the COO Declaration

When all required information is complete, select **SUBMIT DECLARATION** from Summary. After successful submission, the system displays a Declaration Submitted confirmation and returns to COO Declaration Management, where the submitted declaration is shown with status **SUB**.

The screenshot shows the Tradenix web application interface for COO Declaration Management. The page title is "COO Declaration Management" with subtext "Manage Certificate of Origin TradeNet declarations". There are buttons for "REFRESH", "CUSTOM COLUMN", "STATUS LIST", and "DOWNLOAD". A table lists declarations with columns: Job ID, Message Ref, Message Type, Seq No, Created By, Status, Certificate No., Created At, Declarant ID, Declarant Name, Previous Permit Number, and Actions. The table contains 10 rows of data. Two notifications are displayed in the top right corner, both enclosed in a red box:

- Draft Saved**: Your COO declaration draft has been saved successfully.
- Declaration Submitted**: Your COO declaration has been submitted successfully.

The table data is as follows:

Job ID	Message Ref	Message Type	Seq No	Created By	Status	Certificate No.	Created At	Declarant ID	Declarant Name	Previous Permit Number	Actions
