

INP Declaration

1. Page Overview

The In-Non-Payment (INP) declaration workflow is used by authorized users to create, review, save, validate, and submit INP declarations. The declaration is completed across a sequence of tabs: Shipment Info, Transport Info, Party Info, Invoice Info, Items, CPC, and Summary.

2. Navigation

Expected navigation path:

Declarations → In-Non-Payment (INP) → + NEW DECLARATION

3. Declaration Workflow Tabs

Tab	Purpose	Navigation
Shipment Info (S)	Declaration and shipment-level information.	First tab; use NEXT to continue.
Transport Info (T)	Cargo, transport means, arrival, port, and container information.	PREVIOUS returns to Shipment Info; NEXT opens Party Info.
Party Info (P)	Importer, carrier, freight forwarder, and declaring agent details.	PREVIOUS returns to Transport Info; NEXT opens Invoice Info.
Invoice Info (V)	Invoice, supplier/manufacturer, charges, CIF, duty, tax, and GST information.	PREVIOUS returns to Party Info; NEXT opens Items.
Items (I)	Item, HS code, quantity, value, CASC, tariff, shipping mark, and GST details.	PREVIOUS returns to Invoice Info; NEXT opens CPC.
CPC (C)	CPC-related declaration options.	PREVIOUS returns to Items; NEXT opens Summary.
Summary (Y)	Final review, declaration totals, remarks, declaration statement, draft save, validation, and submission.	PREVIOUS returns to CPC; NEXT is not applicable on the final tab.

4. Navigation Button Notes

Control	Action	Important Note
PREVIOUS	Moves the user to the immediately preceding declaration tab.	Use this button to review or correct information already entered. It does not submit the declaration.
NEXT	Moves the user to the immediately following declaration tab.	Complete the mandatory fields required on the current tab before proceeding. Previously entered data should remain available.
SAVE DRAFT	Saves the current INP declaration without final submission.	A successful save is confirmed by a Draft Saved notification. Saving

		a draft is not the same as submitting the declaration.
SUBMIT DECLARATION	Performs final validation and submits the declaration when validation passes.	Use only after reviewing the Summary and confirming all required declaration details.

5. Validation Requirements

- All fields marked with * should be treated as mandatory.
- Mandatory declaration fields should not accept blank or whitespace-only values where text input is required.
- The required Shipment Info, Transport Info, Party Info, Invoice Info, Items, CPC, and Summary information should be completed according to the selected declaration type.
- PREVIOUS should return to the immediately preceding declaration tab without submitting the declaration.
- NEXT should move to the immediately following declaration tab and should preserve information already entered on previous tabs.
- Invalid, incomplete, or inconsistent declaration data should prevent successful final submission.
- Validation messages should clearly identify the field or section requiring correction.
- If Declaration Type is missing, the system should prevent the related operation and display a clear validation error.
- SAVE DRAFT should save the current declaration without final submission and display a clear Draft Saved confirmation message when successful.
- SUBMIT DECLARATION should perform final validation before submission.
- If validation fails, the declaration should remain available for correction and should not be treated as successfully submitted.
- When multiple mandatory fields are missing, the application may display a detailed validation list so the user can correct each required field.
- Successful validation and submission should display clear confirmation notifications and update the declaration status in the INP Declaration Management list.

6. Suggested In-Non-Payment Declaration Management Flow

1. Open Declarations → In-Non-Payment (INP).
2. Review the existing INP declaration list or use the available filters to locate a declaration.
3. Select + NEW DECLARATION to create a new In-Non-Payment declaration.
4. Complete the Shipment Info section and enter all mandatory declaration and shipment details.
5. Use NEXT to proceed through Transport Info, Party Info, Invoice Info, Items, CPC, and Summary. Use PREVIOUS whenever information on an earlier tab must be reviewed or corrected.
6. Enter and verify the required transport, party, invoice, item, CPC, and other applicable declaration information.
7. Use SAVE DRAFT when the declaration must be saved without final submission and verify the Draft Saved notification.
8. Open the Summary page and review the declaration totals, importer details, shipment information, remarks, and declaration statement.
9. Select SUBMIT DECLARATION only after confirming that all required information is complete and correct.
10. If validation fails, review the validation message or detailed error list and return to the relevant tabs to correct the missing or invalid information.
11. Repeat validation after the required corrections are completed.

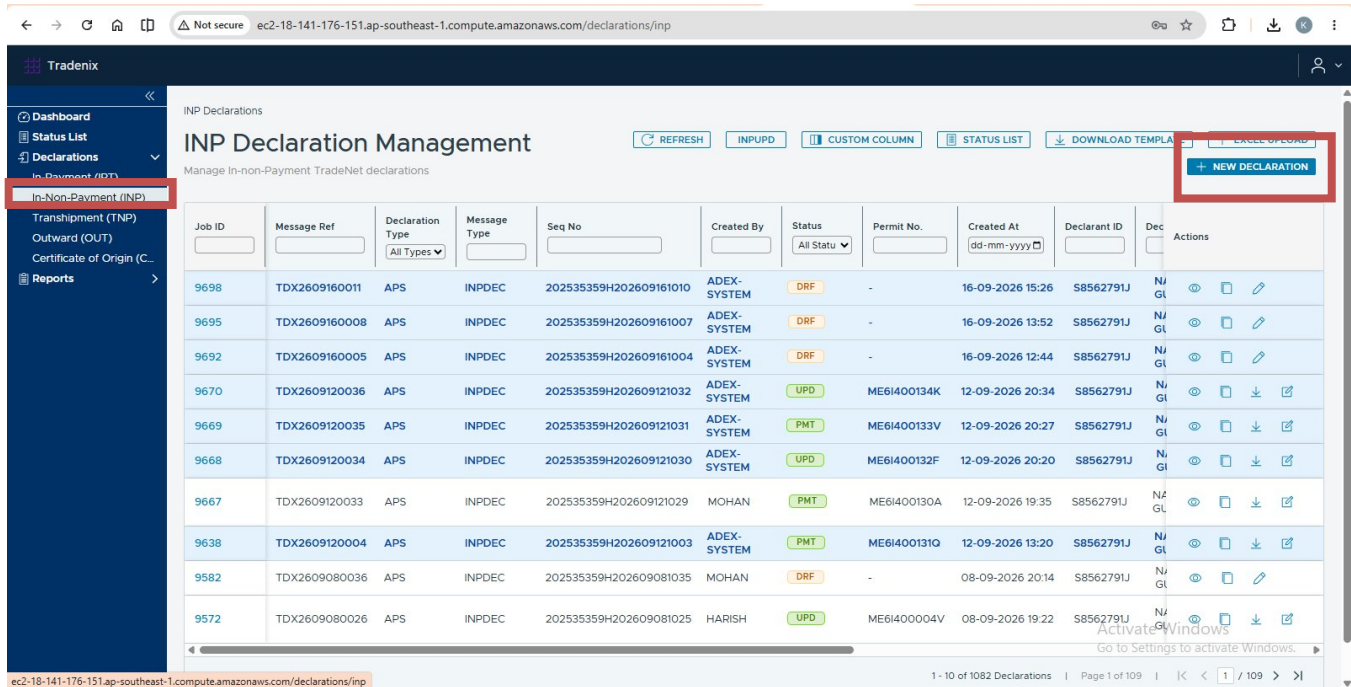

-
12. After successful validation and submission, verify the Validation Passed and Declaration Submitted notifications and confirm that the declaration appears in the INP Declaration Management list with the appropriate status.

Appendix A – UI Reference

Step 1: Open INP Declaration Management

From the left navigation menu, expand Declarations and select In-Non-Payment (INP). The INP Declaration Management page displays existing INP declarations, filters, declaration statuses, row-level actions, and list-level controls. Select + NEW DECLARATION to create a new INP declaration.

The screenshot displays the 'INP Declaration Management' interface. On the left, the navigation menu is expanded to 'Declarations', and 'In-Non-Payment (INP)' is selected. The main content area shows a table of INP declarations. The table has the following columns: Job ID, Message Ref, Declaration Type, Message Type, Seq No, Created By, Status, Permit No., Created At, Declarant ID, and Actions. The table contains 10 rows of data. A '+ NEW DECLARATION' button is located in the top right corner of the table area, highlighted with a red box. The page also includes filters for Job ID, Message Ref, Declaration Type, Message Type, Seq No, Created By, Status, Permit No., and Created At. The status filter is set to 'All Status'. The page footer shows '1 - 10 of 1082 Declarations' and 'Page 1 of 109'.

Figure 1. INP Declaration Management - Add New Declaration

Step 2: Start a New INP Declaration

The system opens the INP declaration entry page at Shipment Info (S). Complete the mandatory declaration and shipment fields shown on the page, including Declaration Type, Cargo Type, Release Location, Receipt Location, and other applicable information.

Note: Shipment Info is the first declaration tab. Use NEXT to continue to Transport Info after completing the required fields.

The screenshot displays the Tradenix web application interface for creating a new INP Declaration. The browser address bar shows the URL: `ec2-18-141-176-151.ap-southeast-1.compute.amazonaws.com/declarations/inp/edit/9702`. The page title is "Tradenix".

The main content area is titled "INP Declarations / Edit Declaration" and features a tabbed interface with the following tabs: **Shipment Info (S)**, Transport Info (T), Party Info (P), Invoice Info (V), Items (I), CPC (C), and Summary (Y). The "Shipment Info (S)" tab is currently active and highlighted with a red box.

On the left side, there is a "Job Info" sidebar containing the following details:

- Message Reference: TDX2609160015
- URN ID: 202535359H
- Sequence Number: 1014
- Declarant Name: NAMASIVAYAM GUNESPARAN
- Declarant Code: S8562791J
- Declarant Phone: 81189066
- Created At: 16-09-2026 18:43
- Created By: kalai
- Updated At: 16-09-2026 18:43
- Updated By: kalai

The main form area contains several sections:

- Declaration Info:** Includes fields for Declaration Type (dropdown), Cargo Type (dropdown), Release Location (dropdown), Receipt Location (dropdown), and Storage Location (dropdown).
- Prev Permit Number:** Includes a field for Previous Permit Number.
- Checks:** Includes a BG Indicator (dropdown), Blanket Start Date (DD/MM/YYYY), and a checkbox for Supply Indicator.
- License/Document:** Includes checkboxes for License and Document.
- Additional Recipients:** Includes a checkbox for Additional Recipients.

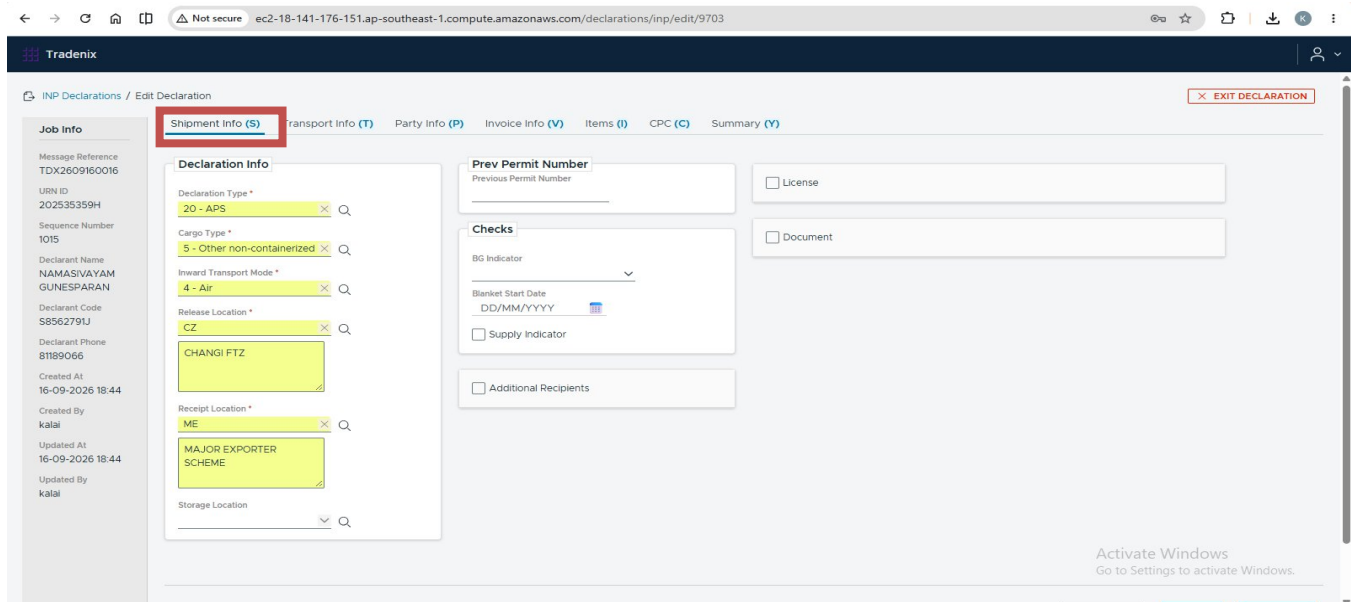

At the bottom right, there is an "Activate" button and a "NEXT" button, which is highlighted with a red box. Other buttons visible are "PREVIOUS" and "SAVE DRAFT".

Figure 2. New INP Declaration - Shipment Info

Step 3: Complete Shipment Information

Enter or select the required Shipment Info values. Depending on the declaration type, the form may also require Inward Transport Mode, Storage Location, Previous Permit Number, BG Indicator, Blanket Start Date, Supply Indicator, License, Document, and Additional Recipients.

Note: Use NEXT to continue from Shipment Info to Transport Info. On later tabs, PREVIOUS can be used to return and correct Shipment Info values.

The screenshot shows the Tradenix INP Declaration form. The 'Shipment Info (S)' tab is selected and highlighted with a red box. The form contains the following sections and fields:

- Job Info:** Message Reference (TDX2609160016), URM ID (202535359H), Sequence Number (1015), Declarant Name (NAMASIVAYAM GUNESPARAN), Declarant Code (S8562791J), Declarant Phone (81189066), Created At (16-09-2026 18:44), Created By (kalai), Updated At (16-09-2026 18:44), Updated By (kalai).
- Declaration Info:**
 - Declaration Type: 20 - APS
 - Cargo Type: 5 - Other non-containerized
 - Inward Transport Mode: 4 - Air
 - Release Location: CZ
 - Receipt Location: ME
 - Storage Location: CHANGI FTZ
- Prev Permit Number:** Previous Permit Number
- Checks:**
 - BG Indicator: [Dropdown]
 - Blanket Start Date: DD/MM/YYYY
 - Supply Indicator: [Checkbox]
 - Additional Recipients: [Checkbox]
- License:** [Checkbox]
- Document:** [Checkbox]

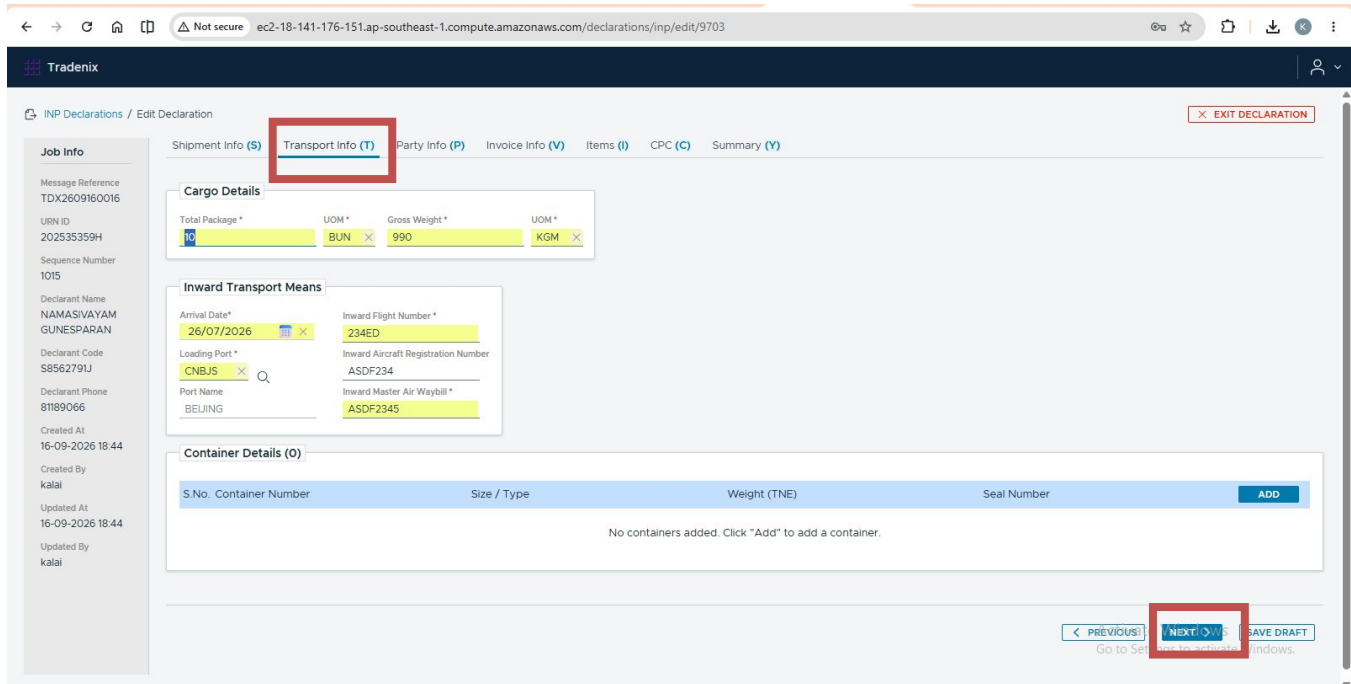

An 'EXIT DECLARATION' button is located in the top right corner. An 'Activate Windows' watermark is visible in the bottom right corner.

Figure 3. Completed Shipment Information

Step 4: Complete Transport Information

Select Transport Info (T) or use NEXT from Shipment Info. Enter cargo details such as Total Package, package UOM, Gross Weight, and weight UOM. Complete applicable inward transport details including Arrival Date, Loading Port, Port Name, Inward Flight Number, aircraft registration number, Inward Master Air Waybill, and container details where required.

Note: PREVIOUS returns to Shipment Info. NEXT proceeds to Party Info.

Go to Settings to activate Windows.

Figure 9. Declaration Summary

Step 10: Save the INP Declaration as Draft

Select **SAVE DRAFT** when the declaration must be stored without final submission. After a successful save, the system displays a Draft Saved notification confirming that the INP declaration draft has been saved successfully.

Note: **SAVE DRAFT** stores the current declaration without final submission and confirms the save with a Draft Saved notification.

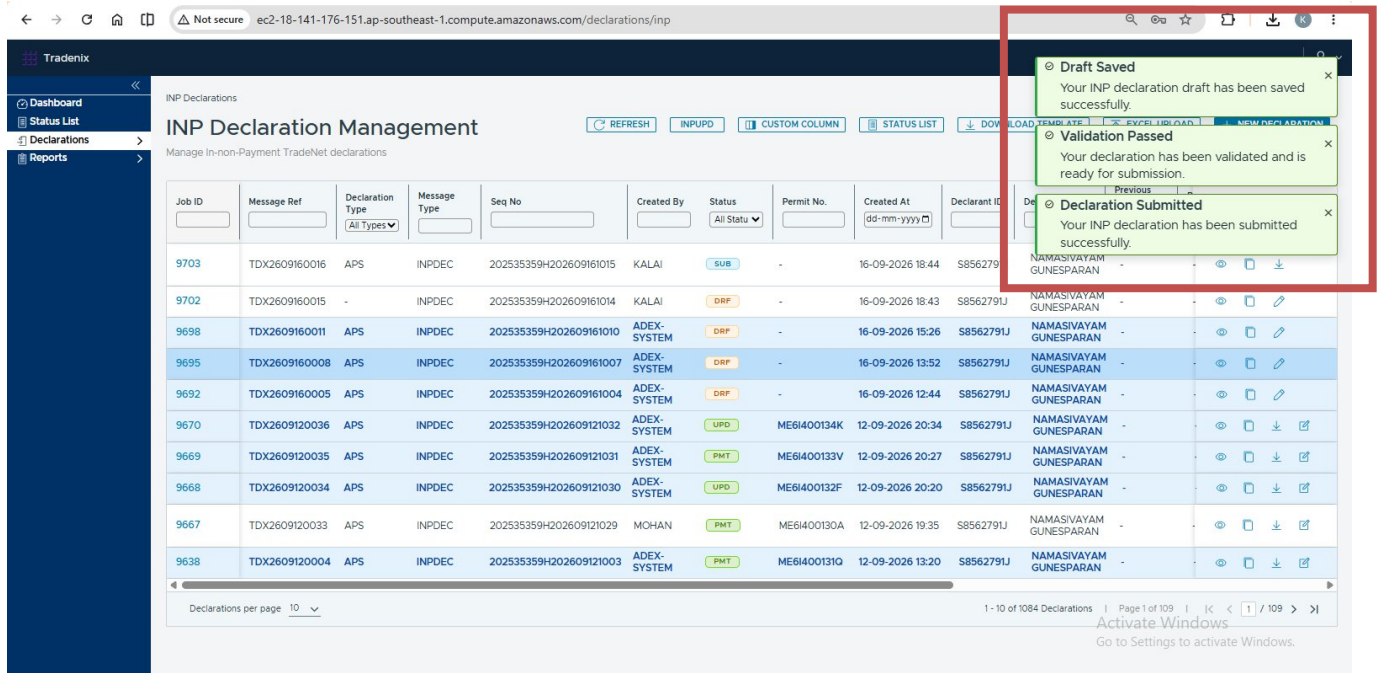

The screenshot shows the Tradenix web application interface for editing an INP declaration. A green notification box in the top right corner states: "Draft Saved. Your INP declaration draft has been saved successfully." The main form is titled "INP Declarations / Edit Declaration" and includes tabs for Shipment Info, Transport Info, Party Info, Invoice Info, Items, CPC, and Summary. The "Summary" tab is active, displaying a "Summary" section with fields for Number of Invoices (1), Number of Items (1), Sum of Invoice Amount (55000.00 SGD), Sum of Item Amount (55000.00 SGD), Total Invoice CIF Value (55000), Total CIF/FOB Value (55000), GST Amount (4950), Excise Duty Amount (0), Customs Duty Amount (0), Other Tax Amount (0), and Total Amount Payable (0). Below this is a "Declaration Summary" section with fields for Importer (UEN), GST DUMMY COMPANY GSTDUMMYCOMPANY (20110715GST), Total Package (10 BUN), Total Gross Weight (990 KGM), Item HS Qty Sum (1230.000 TPR), HAWB Number (ASDF34556), Cross Reference ID, and Shipment ID. At the bottom, there is a checkbox labeled "I/We declare that all particulars in this application are true and correct." and a "SAVE DRAFT" button. The "SUBMIT DECLARATION" button is also visible but not highlighted.

Figure 10. Draft Saved Confirmation

Step 11: Validate and Submit the Declaration

When all required information is complete, select **SUBMIT DECLARATION** from the Summary page. The system validates the declaration before submission. After successful validation and submission, the system displays Validation Passed and Declaration Submitted notifications and returns to the INP Declaration Management list with the updated status.

Note: SUBMIT DECLARATION performs final validation. When validation passes, the declaration is submitted and confirmation notifications are displayed.

The screenshot displays the Tradenix INP Declaration Management interface. The left sidebar contains navigation links for Dashboard, Status List, Declarations, and Reports. The main area shows a table of declarations with columns for Job ID, Message Ref, Declaration Type, Message Type, Seq No, Created By, Status, Permit No., Created At, and Declarant ID. The table lists several declarations, including those with status 'SUB', 'DRP', 'UPD', and 'PMT'. Overlaid on the right side of the interface are three green notification boxes with white text, each with a close button (X):

- Draft Saved:** Your INP declaration draft has been saved successfully.
- Validation Passed:** Your declaration has been validated and is ready for submission.
- Declaration Submitted:** Your INP declaration has been submitted successfully.

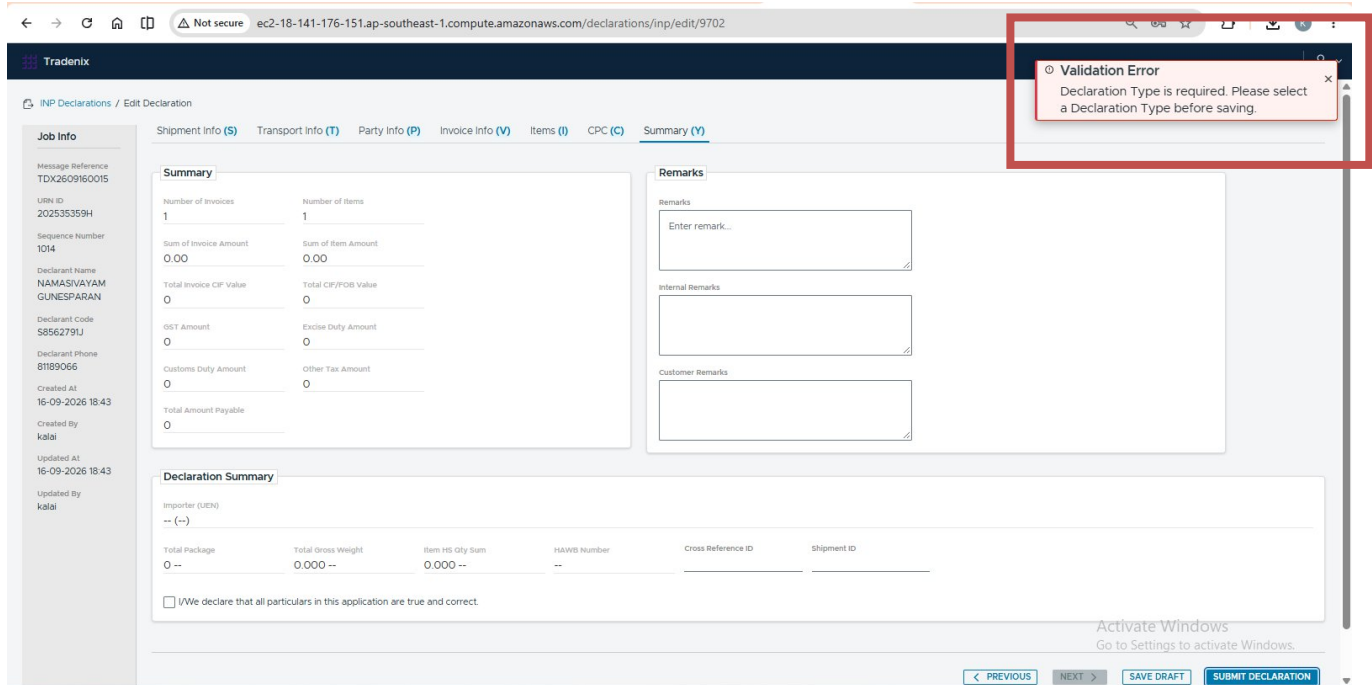

At the bottom of the interface, there is a pagination bar showing 'Declarations per page 10' and '1 - 10 of 1084 Declarations | Page 1 of 109 | < 1 / 109 > |'. An 'Activate Windows' watermark is visible in the bottom right corner.

Figure 11. Validation Passed and Declaration Submitted

Step 12: Validation Error - Missing Declaration Type

If a mandatory field is missing, the system prevents successful submission and displays a validation message. In the example shown, the Declaration Type is missing and the system displays a Validation Error instructing the user to select a Declaration Type before saving.

Note: Validation errors must be corrected before the declaration can be successfully processed.

The screenshot shows the Tradenix INP Declaration form. A red box highlights a validation error message in the top right corner:

Validation Error

Declaration Type is required. Please select a Declaration Type before saving.

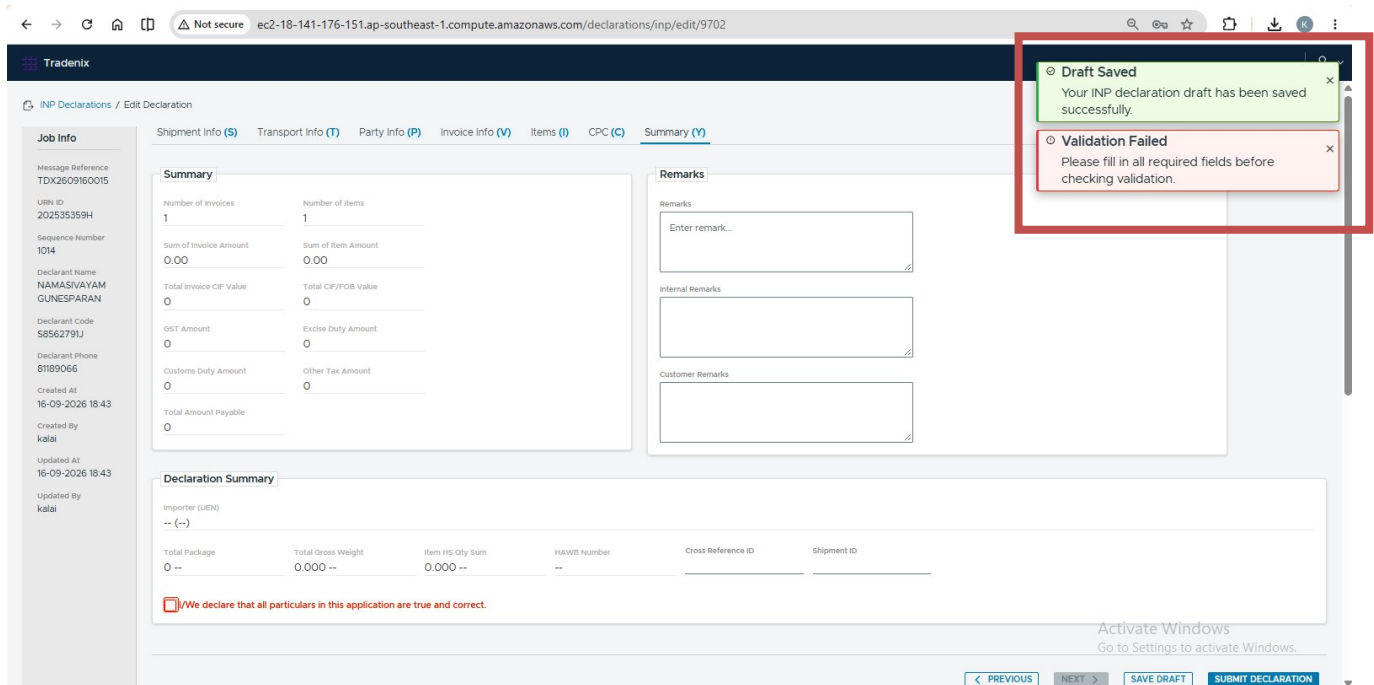

The form itself is titled "INP Declarations / Edit Declaration" and includes a sidebar with "Job Info" and a main content area with tabs for "Summary", "Remarks", "Internal Remarks", and "Customer Remarks". The "Summary" tab is active, showing fields for "Number of Invoices", "Number of Items", "Sum of Invoice Amount", "Sum of Item Amount", "Total Invoice CIF Value", "Total CIF/FOB Value", "GST Amount", "Excise Duty Amount", "Customs Duty Amount", "Other Tax Amount", and "Total Amount Payable". Below these is a "Declaration Summary" section with fields for "Importer (UEN)", "Total Package", "Total Gross Weight", "Item HS Qty Sum", "HAWB Number", "Cross Reference ID", and "Shipment ID". At the bottom, there is a checkbox for "I/We declare that all particulars in this application are true and correct." and a footer with "Activate Windows" and "Go to Settings to activate Windows." buttons.

Figure 12. Validation Error - Declaration Type Required

Step 13: Validation Failed - Required Fields Incomplete

If required declaration information is incomplete, the system displays Validation Failed and instructs the user to fill in all required fields before validation can proceed.

Note: A Validation Failed message indicates that required information is still incomplete.

The screenshot shows the Tradenix INP Declaration form. The browser address bar indicates the URL: ec2-18-141-176-151.ap-southeast-1.compute.amazonaws.com/declarations/inp/edit/9702. The form is titled "INP Declarations / Edit Declaration".

Figure 13. Validation Failed - Required Fields Incomplete

Step 14: Review Detailed Validation Errors

When validation fails, the system may display a detailed list of missing or invalid fields. Review each listed validation item, return to the relevant declaration tabs, correct the required information, and repeat validation before final submission.

Note: Use the detailed validation list to identify all missing fields, then navigate back using **PREVIOUS** or the declaration tabs to correct them.

The screenshot displays the Tradenix INP Declaration interface. On the left, a sidebar contains 'Job Info' with details like Message Reference (TDX2609160015), URN ID (202535359H), and Declarant Name (NAMASIVAYAM GUNESPARAN). The main area has tabs for Shipment Info (S), Transport Info (T), Party Info (P), Invoice Info (V), Items (I), CPC (C), and Summary (Y). The 'Summary' tab is active, showing a 'Summary' section with fields for Number of Invoices (1), Sum of Invoice Amount (0.00), and Total Invoice CIF Value (0). Below this is a 'Declaration Summary' section with fields for Total Package (0), Total Gross Weight (0.000), Item HS Qty Sum (0.000), HAWB Number, Cross Reference ID, and Shipment ID. A red error message at the bottom states: 'We declare that all particulars in this application are true and correct.' On the right, a 'Remarks' section has three text areas: 'Remarks', 'Internal Remarks', and 'Customer Remarks'. A red box highlights two notification messages in the top right corner: a green 'Draft Saved' message and a red 'Validation Failed' message. The 'Validation Failed' message reads: 'Please fill in all required fields before checking validation.' At the bottom right, there are buttons for 'PREVIOUS', 'NEXT', 'SAVE DRAFT', and 'SUBMIT DECLARATION'.

Figure 14. Detailed Validation Errors
