

OUT Declaration

1. Page Overview

The Outward (OUT) declaration workflow is used by authorized users to create, review, save, validate, and submit outward TradeNet declarations. The declaration is completed across a sequence of tabs: Shipment Info, Transport Info, Party Info, Invoice, Items, CPC, and Summary.

2. Navigation

Expected navigation path:

Declarations → Outward (OUT) → + NEW DECLARATION

3. Declaration Workflow Tabs

Tab	Purpose	Navigation
Shipment Info (S)	Declaration type, cargo type, transport mode, release/receipt locations, previous permit, certificate of origin, and other shipment-level information.	First tab / use NEXT to continue.
Transport Info (T)	Cargo details, inward and outward transport means, vessel information, ports, voyage details, and container information.	PREVIOUS returns to Shipment Info; NEXT opens Party Info.
Party Info (P)	Importer, inward/outward carrier, freight forwarder, declaring agent, exporter, consignee, end user, and manufacturer details where applicable.	PREVIOUS returns to Transport Info; NEXT opens Invoice.
Invoice (V)	Invoice number/date, supplier or manufacturer party, term type, currencies, charges, CIF, duties, tax, and GST.	PREVIOUS returns to Party Info; NEXT opens Items.
Items (I)	Item references, HS Code, description, country of origin, quantity/UOM, values, CASC, certificate-of-origin details, shipping marks, tariff and related information.	PREVIOUS returns to Invoice; NEXT opens CPC.
CPC (C)	CPC-related options such as AEO, CWC, SEASTORE, STS, International Permit Exchange, CNB, and Deferred Printing of CO.	PREVIOUS returns to Items; NEXT opens Summary.
Summary (Y)	Final totals, CIF/FOB value, remarks, declaration statement, validation, draft save, and submission.	PREVIOUS returns to CPC; NEXT is not applicable at the final tab.

4. Navigation Button Notes

Control	Action	Important Note
PREVIOUS	Moves to the immediately preceding declaration tab.	Use when earlier information must be reviewed or corrected. It does not submit the declaration.
NEXT	Moves to the immediately following	Complete the mandatory fields required

Control	Action	Important Note
	declaration tab.	by the current workflow before proceeding. Entered data should remain available while navigating.
SAVE DRAFT	Stores the current OUT declaration without final submission.	A successful save is confirmed by the Draft Saved notification. Saving a draft is not the same as submitting the declaration.
SUBMIT DECLARATION	Runs final validation and submits the OUT declaration when validation succeeds.	Use only after reviewing the Summary and confirming the declaration statement. Validation or submission notifications indicate the result.
EXIT DECLARATION	Leaves the declaration entry/edit page.	Use only after saving any information that must be retained.

5. Validation Requirements

- All fields marked with * should be treated as mandatory.
- Declaration Type is mandatory. If it is missing, the application displays a Validation Error instructing the user to select a Declaration Type before saving or processing.
- Mandatory declaration information should not accept blank or whitespace-only values where text input is required.
- Invalid, incomplete, or inconsistent declaration data should prevent successful final submission.
- If required data is missing, the application can display a Validation Failed notification and a detailed validation panel identifying missing or invalid fields.
- The declaration statement “I/We declare that all the particulars in this Application are true and correct.” must be confirmed before final submission when required by the application.
- SAVE DRAFT stores the current declaration without final submission and displays a Draft Saved confirmation when successful.
- Saving a draft does not mean the declaration passed final submission validation; unresolved mandatory fields must still be corrected before submission.
- SUBMIT DECLARATION performs final validation before the declaration is submitted.
- If validation fails, the declaration remains available for correction and should not be treated as successfully submitted.
- After successful validation and submission, confirmation notifications are displayed and the declaration appears in the OUT Declaration Management list with the appropriate status.

6. Suggested Outward Declaration Management Flow

1. Open Declarations → Outward (OUT).
2. Review the existing OUT declaration list or use the available filters to locate a declaration.
3. Select + NEW DECLARATION to begin a new outward declaration.
4. Complete Shipment Info, including Declaration Type, Cargo Type, transport mode, Release Location, Receipt Location, and applicable Certificate of Origin information.
5. Use NEXT to proceed through Transport Info, Party Info, Invoice, Items, CPC, and Summary. Use PREVIOUS to return to an earlier tab when information must be reviewed or corrected.
6. Complete all transport, party, invoice, item, CPC, and other applicable declaration information.
7. Use SAVE DRAFT when the declaration must be stored without final submission and verify the Draft Saved confirmation.
8. On Summary, review item totals, invoice values, Total CIF/FOB Value, transport summary, remarks, and the declaration statement.

- 9.** Select SUBMIT DECLARATION only after all mandatory information is complete and the declaration statement has been confirmed.
- 10.** If validation fails, review the toast message and detailed validation panel, correct the identified fields, and submit again.
- 11.** After successful validation and submission, verify the success notifications and confirm the declaration appears in OUT Declaration Management with the resulting status.

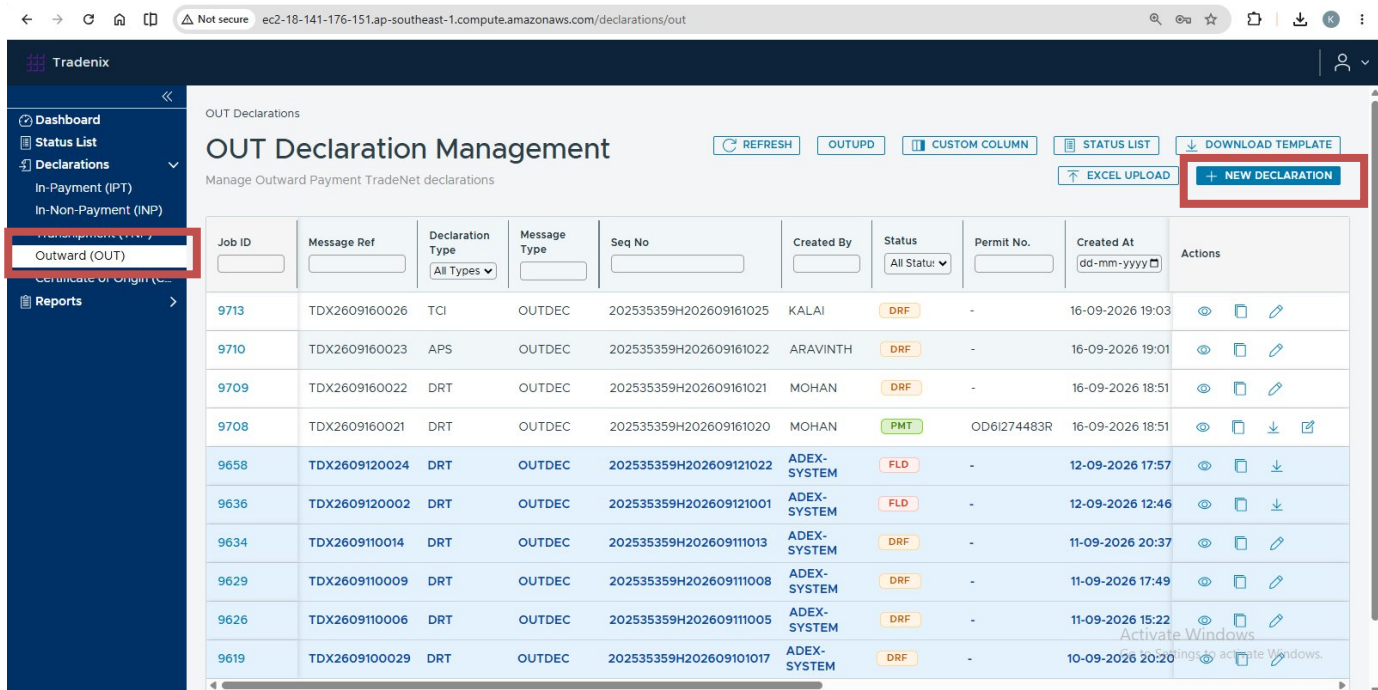

Appendix A – UI Reference

The following screenshots show the outward declaration workflow, including declaration creation, validation failures, completed declaration tabs, draft saving, and successful submission.

Step 1: Open OUT Declaration Management

From the left navigation menu, expand Declarations and select Outward (OUT). The OUT Declaration Management page displays existing outward declarations, filters, statuses, row actions, and declaration-level controls. Select + NEW DECLARATION to begin a new OUT declaration.

Note: The management page also provides controls such as Refresh, OUTUPD, Custom Column, Status List, Download Template, and Excel Upload.

Figure 1. OUT Declaration Management - Add New Declaration

Step 2: Start a New OUT Declaration

The system opens the OUT declaration entry page at Shipment Info (S). Complete the mandatory declaration fields, including Declaration Type, Cargo Type, Outward Transport Mode, Release Location, and Receipt Location, together with other shipment information required for the declaration.

Note: Select NEXT to continue after the required information has been completed. SAVE DRAFT stores the current declaration without final submission.

The screenshot displays the 'Edit Declaration' interface in the Tradenix system. The 'Shipment Info (S)' tab is active and highlighted with a red box. The interface is divided into several sections:

- Job Info (Left Sidebar):** Contains metadata such as Message Reference (TDX2609160028), UTRN ID (202535359H), Sequence Number (1027), Declarant Name (NAMASIVAYAM GUNESPARAN), Declarant Code (S856279U), Declarant Phone (81189066), Created At (16-09-2026 19:07), Created By (kalai), Updated At (16-09-2026 19:07), and Updated By (kalai).
- Declaration Info (Main Form):** Includes dropdown menus for Declaration Type, Cargo Type, Outward Transport Mode, Release Location, Receipt Location, and Storage Location, each with a search icon.
- Prev Permit Number:** A text input field for the Previous Permit Number.
- Checks:** Includes a dropdown for BO Indicator (Set to 'Select...'), a date field for Blanket start Date (DD/MM/YYYY), and a checkbox for Additional Recipients.
- Certificate of Origin:** Includes a dropdown for CO Type, a checkbox for License, and a checkbox for Document.

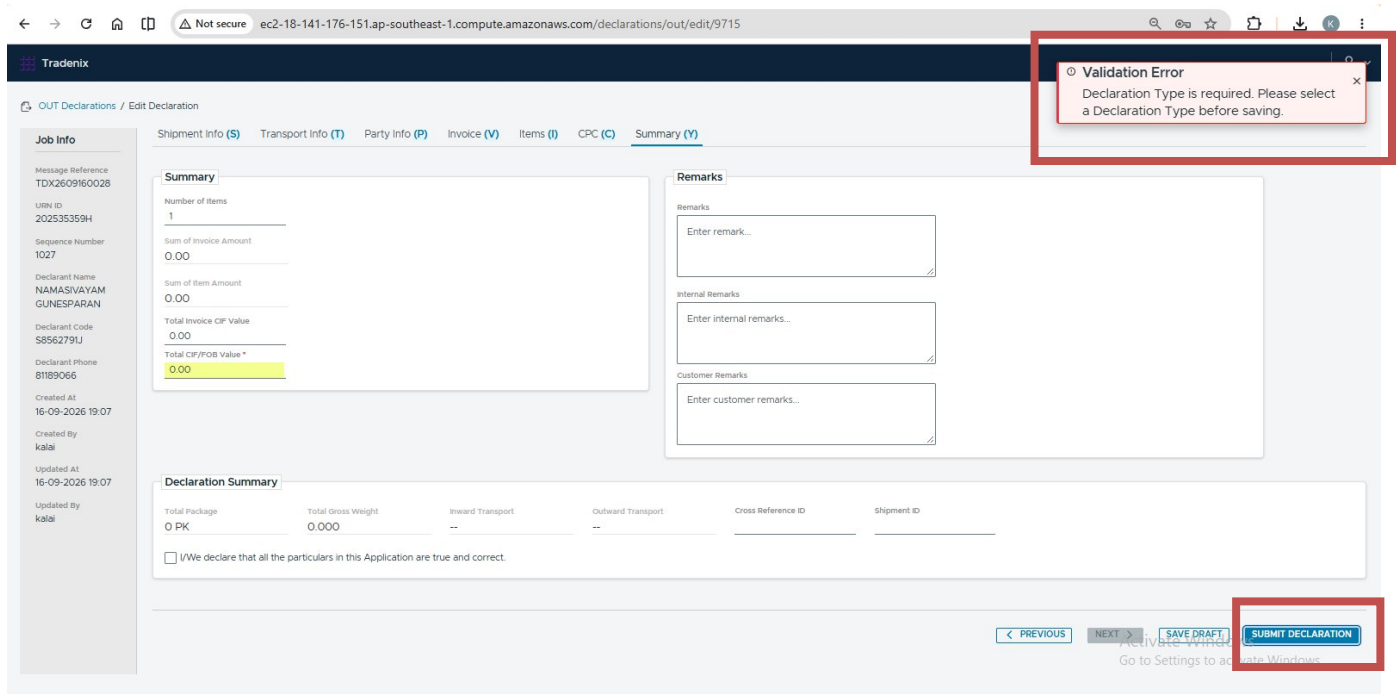

At the bottom right, there are navigation buttons: 'PREVIOUS', 'NEXT', and 'SAVE DRAFT'. A note at the bottom right states: 'Go to Settings to activate Windows.'

Figure 2. New OUT Declaration - Shipment Info

Step 3: Review Validation Error for Missing Declaration Type

If Declaration Type is not selected, the system displays a Validation Error message stating that Declaration Type is required. The declaration must be corrected before the relevant save or submission action can complete successfully.

Note: The screenshot shows the Summary tab with the red Validation Error notification at the top-right.

The screenshot displays the Tradenix web application interface for editing an OUT Declaration. The browser address bar shows the URL: `ec2-18-141-176-151.ap-southeast-1.compute.amazonaws.com/declarations/out/edit/9715`. The page title is "Tradenix".

The main content area is titled "OUT Declarations / Edit Declaration" and features several tabs: "Shipment Info (S)", "Transport Info (T)", "Party Info (P)", "Invoice (V)", "Items (I)", "CPC (C)", and "Summary (Y)". The "Summary (Y)" tab is currently selected.

On the left side, there is a "Job Info" sidebar containing details such as Message Reference (TDX2609160028), UIN ID (202535359H), Sequence Number (1027), Declarant Name (NAMASIVAYAM GUNESPARAN), Declarant Code (S8562791J), Declarant Phone (81189066), Created At (16-09-2026 19:07), Created By (kalai), Updated At (16-09-2026 19:07), and Updated By (kalai).

The main form area is divided into two main sections: "Summary" and "Remarks".

The "Summary" section includes fields for:

- Number of Items: 1
- Sum of Invoice Amount: 0.00
- Sum of Item Amount: 0.00
- Total Invoice CIF Value: 0.00
- Total CIF/FOB Value *: 0.00

The "Remarks" section includes three text areas for "Remarks", "Internal Remarks", and "Customer Remarks", each with a placeholder "Enter remark...".

Below these sections is a "Declaration Summary" table with the following data:

Total Package	Total Gross Weight	Inward Transport	Outward Transport	Cross Reference ID	Shipment ID
0 PK	0.000	--	--		

At the bottom of the form, there is a checkbox labeled "I/We declare that all the particulars in this Application are true and correct."

At the bottom right of the page, there are navigation buttons: "< PREVIOUS", "NEXT >", "SAVE DRAFT", and "SUBMIT DECLARATION". The "SUBMIT DECLARATION" button is highlighted with a red box.

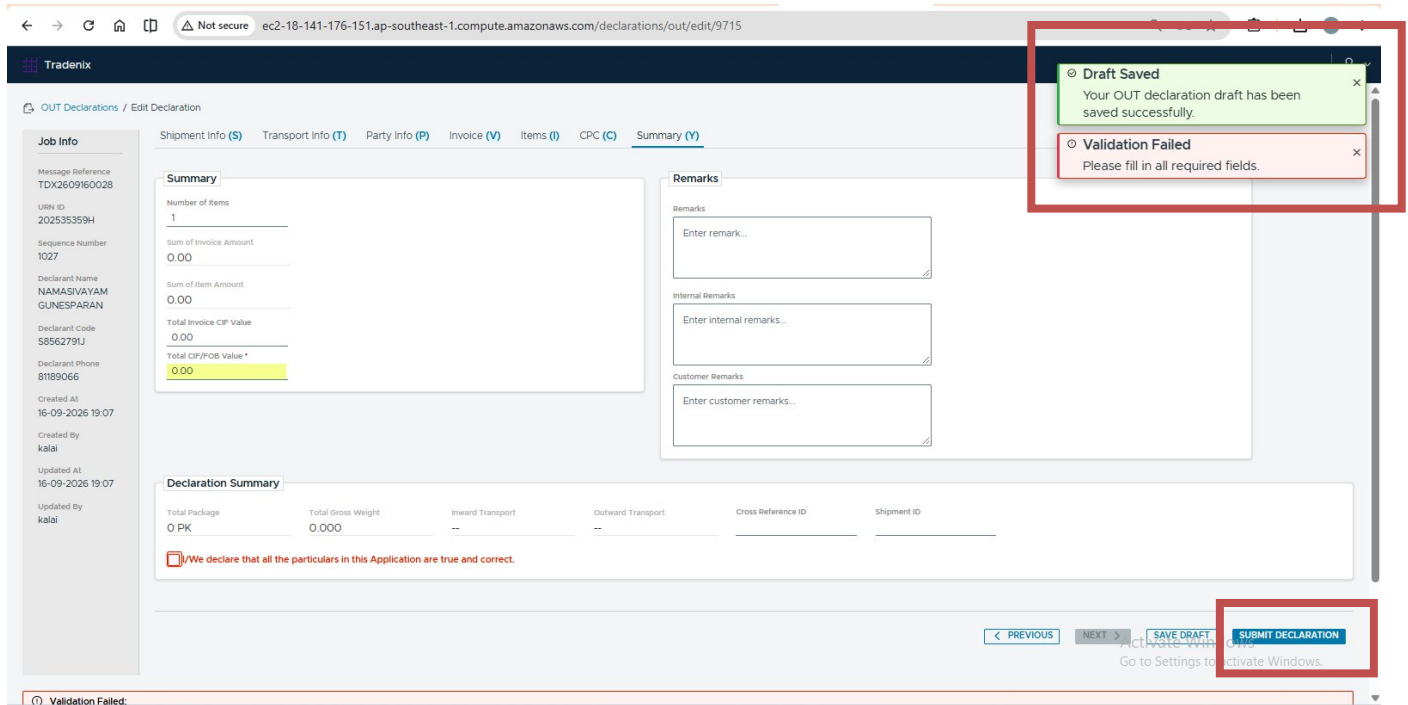

A red validation error notification box is displayed in the top right corner, stating: "Validation Error Declaration Type is required. Please select a Declaration Type before saving."

Figure 3. Validation Error - Declaration Type Required

Step 4: Review Draft Save and Validation Failed Notifications

The application can confirm that the draft was saved while also indicating that required fields are still incomplete. A green Draft Saved notification confirms storage of the draft, while the red Validation Failed notification indicates that the declaration is not ready for final submission.

Note: Saving a draft is independent from successful final submission validation.

The screenshot displays the Tradenix web application interface for editing an OUT Declaration. The browser address bar shows a URL from Amazon AWS. The page has a dark blue header with the Tradenix logo and a navigation bar with tabs for Shipment Info (S), Transport Info (T), Party Info (P), Invoice (V), Items (I), CPC (C), and Summary (Y). The Summary tab is active.

On the left, a 'Job Info' sidebar lists details: Message Reference (TDX2609160028), URN ID (202535359H), Sequence Number (1027), Declarant Name (NAMASIVAYAM GUNESPARAN), Declarant Code (S856279U), Declarant Phone (8189066), Created At (16-09-2026 19:07), Created By (kalai), Updated At (16-09-2026 19:07), and Updated By (kalai).

The main form area is divided into sections:

- Summary:** Includes fields for Number of Items (1), Sum of Invoice Amount (0.00), Sum of Item Amount (0.00), Total Invoice CIF Value (0.00), and Total CIF/FOB Value * (0.00).
- Remarks:** Contains three text areas for Remarks, Internal Remarks, and Customer Remarks.
- Declaration Summary:** A table with columns: Total Package (0 PK), Total Gross Weight (0.000), Inward Transport (--), Outward Transport (--), Cross Reference ID, and Shipment ID.
- Declaration Statement:** A checkbox labeled 'We declare that all the particulars in this Application are true and correct.'

Two notifications are displayed in the top right corner, highlighted by a red box:

- Draft Saved:** A green notification stating 'Your OUT declaration draft has been saved successfully.'
- Validation Failed:** A red notification stating 'Please fill in all required fields.'

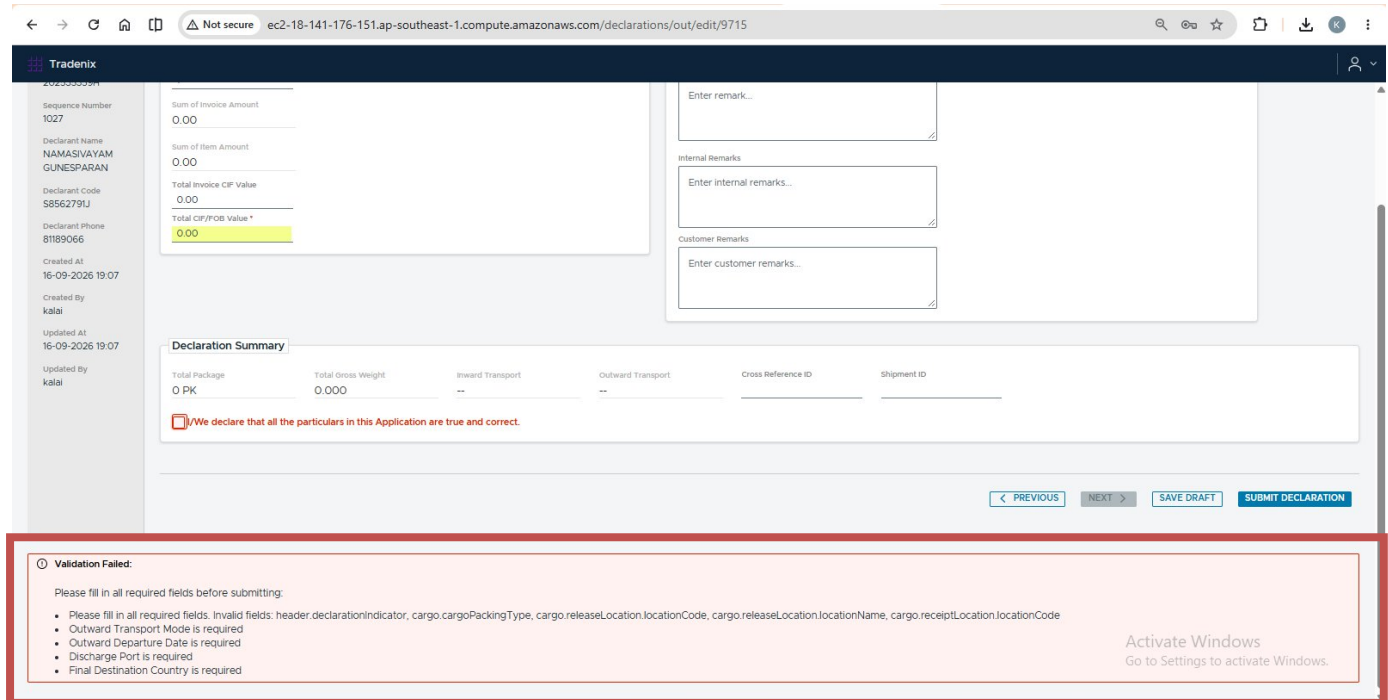

At the bottom right, there are buttons for '< PREVIOUS', 'NEXT >', 'SAVE DRAFT', and 'SUBMIT DECLARATION'. The 'SUBMIT DECLARATION' button is highlighted by a red box. A footer message at the bottom left reads 'Validation Failed:'.

Figure 4. Draft Saved and Validation Failed Notifications

Step 5: Review Detailed Validation Failures

When final validation fails, review the detailed validation panel displayed below the Summary section. The panel lists missing or invalid information, such as required declaration/cargo fields, transport mode, departure date, discharge port, or final destination country.

Note: Correct every identified error before attempting SUBMIT DECLARATION again.

The screenshot shows the Tradenix web application interface. The top navigation bar includes the Tradenix logo and a user profile icon. The main content area is divided into several sections:

- Left Sidebar:** Contains user information and metadata:
 - Sequence Number: 1027
 - Declarant Name: NAMASIVAYAM GUNESPARAN

Step 6: Complete Shipment Information

Enter or verify the Shipment Info values for the OUT declaration. The completed example includes Declaration Type, Cargo Type, Inward Transport Mode, Outward Transport Mode, Release Location, Receipt Location, and Certificate of Origin details where applicable.

Note: Additional shipment controls such as previous permit number, checks, recipients, license, and document may be completed depending on the declaration scenario.

Step 8: Complete Party Information

Select Party Info (P) or use NEXT from Transport Info. Enter or verify the parties involved in the outward declaration, including Importer, Inward Carrier, Freight Forwarder, Outward Carrier, Declaring Agent, Exporter, Consignee, End User, and Manufacturer where applicable. Verify UEN and address information before proceeding.

Note: PREVIOUS returns to Transport Info. NEXT proceeds to Invoice.

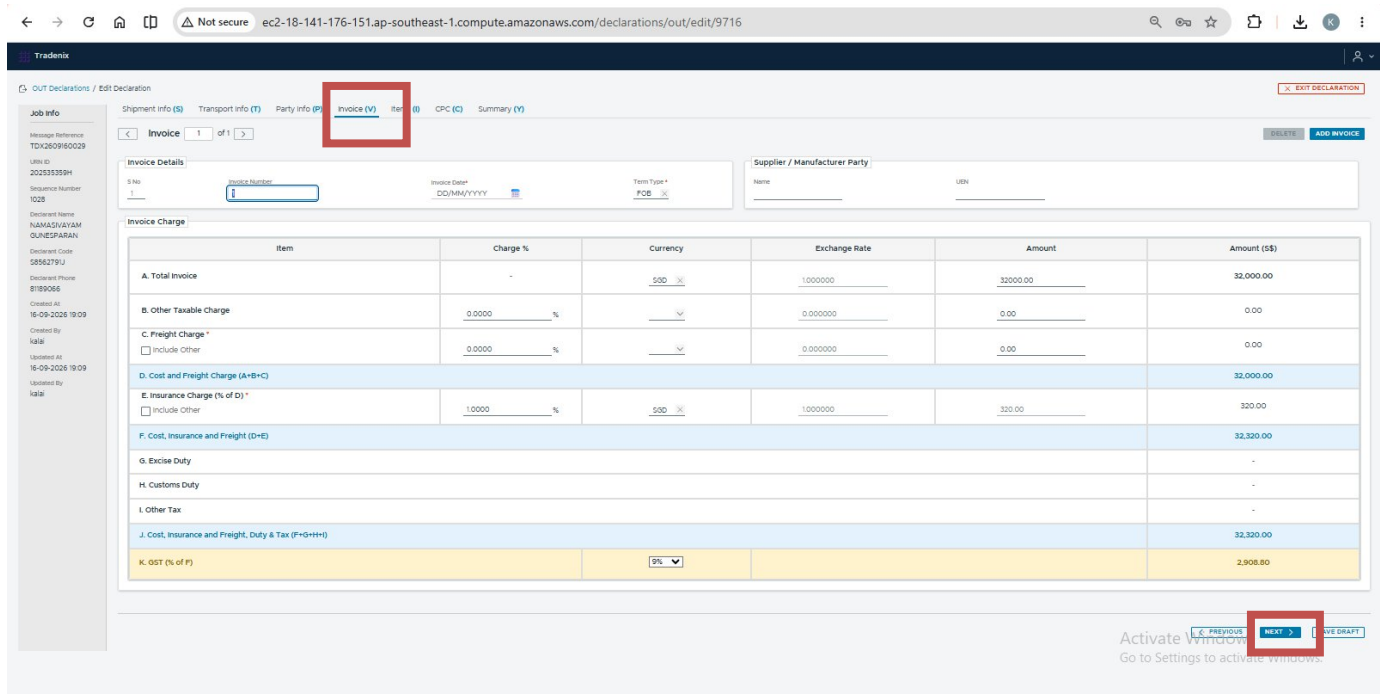

The screenshot shows the 'Party Info (P)' tab selected in the Tradenix system. The form is titled 'OUT Declarations / Edit Declaration' and includes a navigation bar with tabs: Shipment Info, Transport Info, Party Info (P), Items, CPC, and Summary. The 'Party Info (P)' tab is highlighted with a red box. The form contains several sections for party information, each with a search icon and a 'UEN' field. The sections are: Importer, Inward Carrier, Freight Forwarder, Outward Carrier, Declaring Agent, Exporter, Consignee, End User, and Manufacturer. Each section has fields for Name, UEN, Address, and Country. A 'NEXT' button is highlighted with a red box at the bottom right of the form.

Figure 8. Party Information

Step 9: Complete Invoice Information

Select Invoice (V) or use NEXT from Party Info. Enter the invoice number, invoice date, term type, supplier/manufacturer party, currency, invoice amount, and applicable freight, insurance, duties, tax, and GST information. Review calculated CIF and other totals shown by the system.

Note: PREVIOUS returns to Party Info. NEXT proceeds to Items.

Figure 9. Invoice Information

Step 10: Complete Item Information

Select Items (I) or use NEXT from Invoice. Add the required item data, including inward/outward HAWB or shipment references where applicable, HS Code, description, brand, country of origin, quantity, UOM, item value, and related CASC, certificate-of-origin, shipping mark, tariff, or GST information.

Note: PREVIOUS returns to Invoice. NEXT proceeds to CPC.

The screenshot shows the 'Item Information' form in the Tradenix application. The 'Items' tab is selected and highlighted with a red box. The form is divided into several sections:

- Item Details:** Includes fields for Item No., Inward HAWB, Outward HAWB, Item Name, Item Description, Item Type, Item Code, Item Value, and Item Quantity.
- CASC Details:** Includes fields for Product Code, Quantity, UOM, and a description field.
- Item Quantity & Value:** Includes fields for Item Quantity, Item Value, and Item Unit.
- Certificate of Origin (COO):** Includes fields for Certificate Number, UOM, Manufacturing Date, and various origin-related fields.
- Item Summary:** A table summarizing the item information.

The 'Items' tab is also highlighted in the bottom navigation bar. The 'NEXT' button is visible in the bottom right corner.

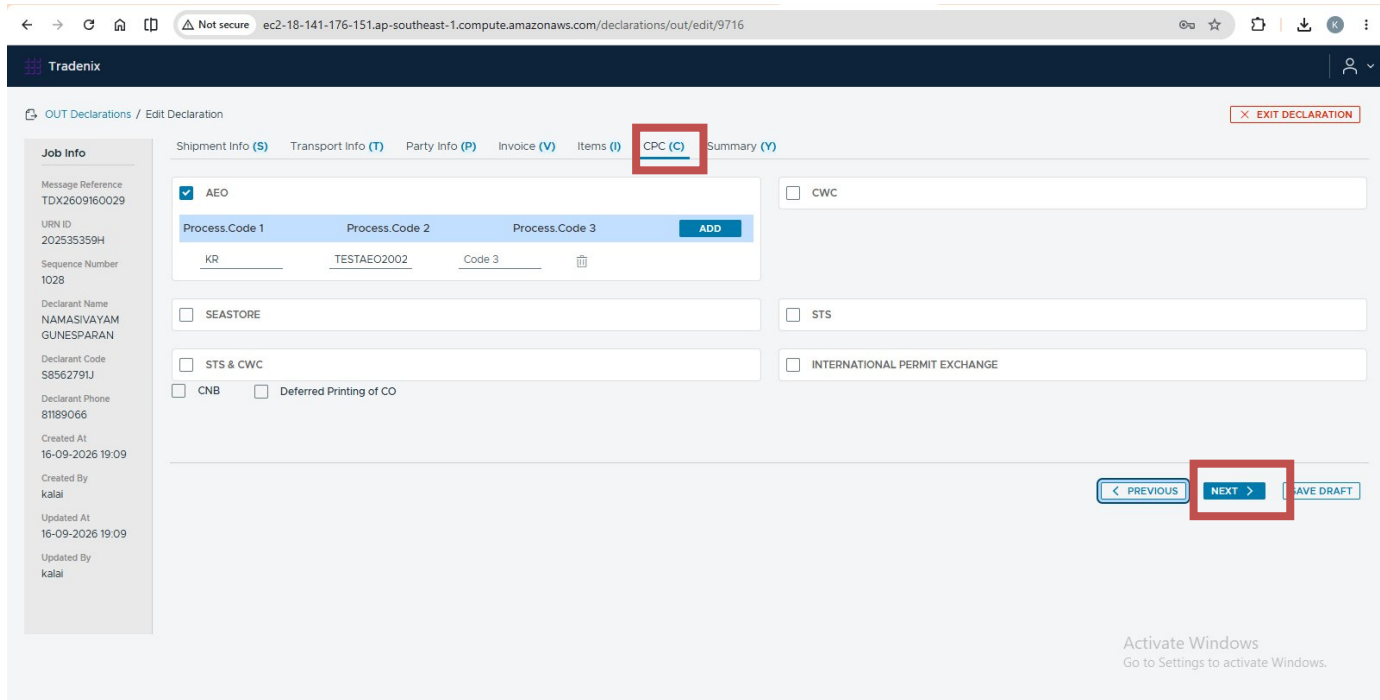

ITEM NO	HS CODE	DESCRIPTION	QTY	QUANTITY	UOM	CURRENCY	ITEM VALUE	ORIGIN	SET
1	843000	AIR CONDITIONERS USED FOR PERSONS IN MOTOR VEHICLES OF COOLING CAPACITY NOT OVER 20,000 BTU	5	5	NONE	USD	32,000.00	0.00	

Figure 10. Item Information

Step 11: Complete CPC Information

Select CPC (C) or use NEXT from Items. Choose the CPC-related options applicable to the declaration, such as AEO, CWC, SEASTORE, STS, STS & CWC, International Permit Exchange, CNB, or Deferred Printing of CO. Where AEO is selected, enter the required process codes.

Note: PREVIOUS returns to Items. NEXT proceeds to Summary.

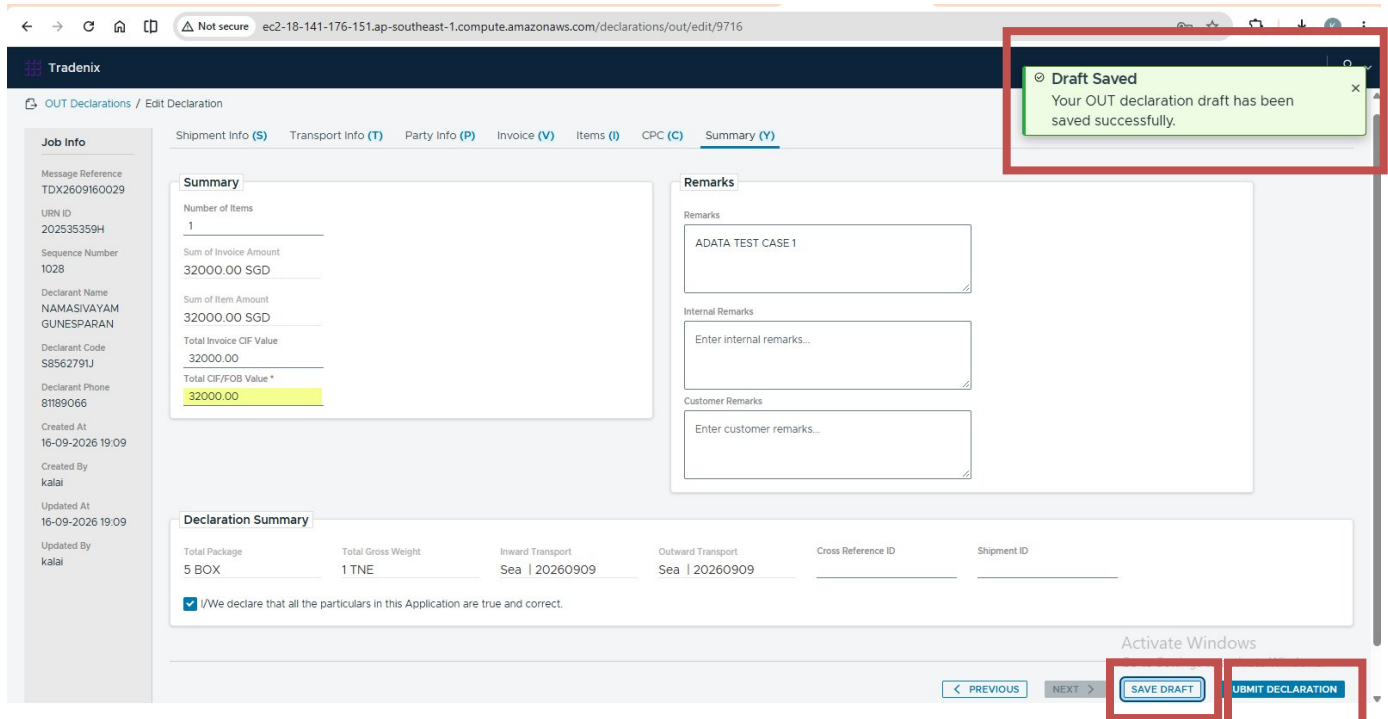

The screenshot shows the 'CPC (C)' tab selected in the 'OUT Declarations / Edit Declaration' interface. The 'Job Info' sidebar on the left contains details such as Message Reference (TDX2609160029), URN ID (202535359H), and Declarant Name (NAMASIVAYAM GUNESPARAN). The main form area has tabs for Shipment Info (S), Transport Info (T), Party Info (P), Invoice (V), Items (I), CPC (C), and Summary (Y). The CPC (C) tab is active, showing a table for process codes with columns 'Process.Code 1', 'Process.Code 2', and 'Process.Code 3'. The first row contains 'KR', 'TESTAEO2002', and 'Code 3'. Below the table are checkboxes for AEO (checked), CWC, SEASTORE, STS, STS & CWC, and CNB. There is also a checkbox for 'Deferred Printing of CO'. At the bottom right, there are buttons for '< PREVIOUS', 'NEXT >', and 'SAVE DRAFT'. The 'NEXT >' button is highlighted with a red box. An 'EXIT DECLARATION' button is located at the top right.

Figure 11. CPC Information

Step 12: Review the Declaration Summary and Save Draft

Select Summary (Y) or use NEXT from CPC. Review the number of items, invoice amount, item amount, Total Invoice CIF Value, Total CIF/FOB Value, package and gross weight summary, inward/outward transport, remarks, and declaration statement. Use SAVE DRAFT when the declaration must be stored without final submission.

Note: The green Draft Saved notification confirms that the OUT declaration draft was saved successfully. Confirm the declaration statement before final submission when required.

The screenshot shows the Tradenix web application interface for editing an OUT Declaration. The browser address bar indicates the URL: `ec2-18-141-176-151.ap-southeast-1.compute.amazonaws.com/declarations/out/edit/9716`. The page title is "Tradenix" and the breadcrumb is "OUT Declarations / Edit Declaration".

The main content area is divided into several sections:

- Job Info:** A sidebar on the left containing details such as Message Reference (TDX2609160029), URN ID (202535359H), Sequence Number (1028), Declarant Name (NAMASIVAYAM GUNESPARAN), Declarant Code (S8562791J), Declarant Phone (81189066), Created At (16-09-2026 19:09), Created By (kalai), Updated At (16-09-2026 19:09), and Updated By (kalai).
- Summary:** A section with fields for Number of Items (1), Sum of Invoice Amount (32000.00 SGD), Sum of Item Amount (32000.00 SGD), Total Invoice CIF Value (32000.00), and Total CIF/FOB Value* (32000.00).
- Remarks:** A section with fields for Remarks (ADATA TEST CASE 1), Internal Remarks (Enter internal remarks...), and Customer Remarks (Enter customer remarks...).
- Declaration Summary:** A section with fields for Total Package (5 BOX), Total Gross Weight (1 TNE), Inward Transport (Sea | 20260909), Outward Transport (Sea | 20260909), Cross Reference ID, and Shipment ID. A checkbox is checked, indicating "I/We declare that all the particulars in this Application are true and correct."

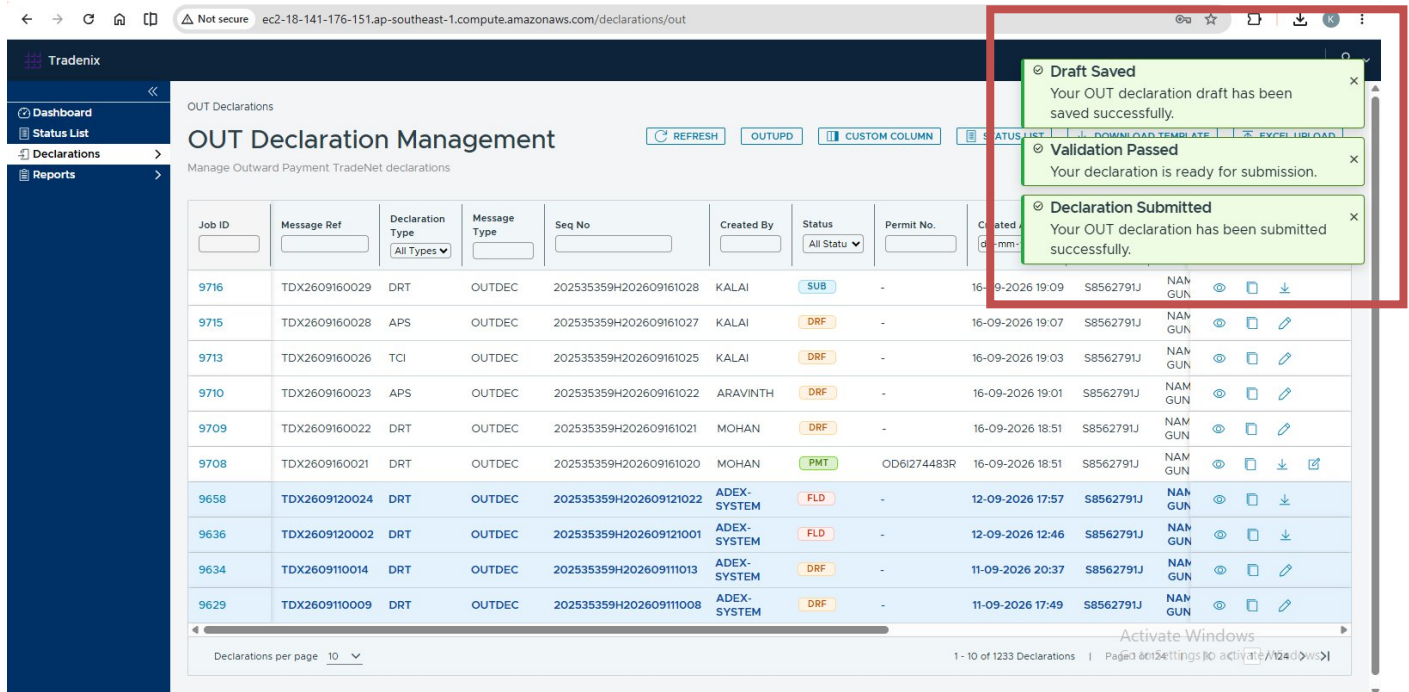

A green notification box in the top right corner states: "Draft Saved. Your OUT declaration draft has been saved successfully." The "SAVE DRAFT" button at the bottom right is highlighted with a red box.

Figure 12. Declaration Summary - Draft Saved

Step 13: Validate and Submit the OUT Declaration

After all mandatory information is complete, select **SUBMIT DECLARATION** from the Summary page. The system performs final validation. When validation succeeds, the application displays confirmation messages and returns to the OUT Declaration Management list.

Note: The example shows Draft Saved, Validation Passed, and Declaration Submitted notifications. The submitted declaration appears in the list with status **SUB**.

Figure 13. Validation Passed and Declaration Submitted

Step 14: Verify the Submitted Declaration in Management

Confirm that the submitted declaration appears in OUT Declaration Management with the expected Message Ref, Declaration Type, Message Type, sequence information, creator, and resulting status. Use the available row actions according to the user's permissions and the declaration status.

Note: A successfully submitted declaration is shown with status SUB in the example.

The screenshot displays the 'OUT Declaration Management' interface. On the left is a sidebar with navigation links: Dashboard, Status List, Declarations, and Reports. The main area shows a table of declarations with columns: Job ID, Message Ref, Declaration Type, Message Type, Seq No, Created By, Status, Permit No., and Created At. The status column shows various statuses like SUB, DRF, FLD, and PMT. Overlaid on the right side of the table are three green notification boxes:

- Draft Saved:** Your OUT declaration draft has been saved successfully.
- Validation Passed:** Your declaration is ready for submission.
- Declaration Submitted:** Your OUT declaration has been submitted successfully.

Below the table, there is a pagination bar showing 'Declarations per page 10' and '1 - 10 of 1233 Declarations'.
