

TNP Declaration

1. Page Overview

The Transshipment (TNP) declaration workflow is used by authorized users to create, review, save, validate, and submit transshipment declarations. The declaration is completed across Shipment Info, Transport Info, Party Info, Items, CPC, and Summary.

2. Navigation

Expected navigation path:

Declarations → Transshipment (TNP) → + NEW DECLARATION

3. Declaration Workflow Tabs

Tab	Purpose	Navigation
Shipment Info (S)	Declaration and shipment-level information.	First tab; use NEXT to continue.
Transport Info (T)	Cargo, inward/outward transport, port, destination, and container information.	PREVIOUS returns to Shipment Info; NEXT opens Party Info.
Party Info (P)	Carrier, handling agent, declaring agent, consignee, and end-user details.	PREVIOUS returns to Transport Info; NEXT opens Items.
Items (I)	Item, transport references, HS code, packing, quantity, value, CASC, and shipping-mark details.	PREVIOUS returns to Party Info; NEXT opens CPC.
CPC (C)	CPC-related declaration options.	PREVIOUS returns to Items; NEXT opens Summary.
Summary (Y)	Final review, package/weight totals, remarks, declaration statement, save, validation, and submission.	PREVIOUS returns to CPC; NEXT is not applicable on the final tab.

4. Navigation Button Notes

Control	Action	Important Note
PREVIOUS	Moves to the immediately preceding declaration tab.	Use it to review or correct information already entered. It does not submit the declaration.
NEXT	Moves to the immediately following declaration tab.	Complete the mandatory information required on the current tab before proceeding.
SAVE DRAFT	Saves the current TNP declaration without final submission.	A successful save should display a Draft Saved confirmation.
SUBMIT DECLARATION	Performs final validation and submits the declaration when validation passes.	Use only after reviewing Summary and confirming all required details.

5. Validation Requirements

- All fields marked with * should be treated as mandatory.
- Mandatory declaration fields should not accept blank or whitespace-only values where text input is required.
- Declaration Type, Cargo Type, required transport references, Release Location, Receipt Location, package details, gross weight, item information, and declaration confirmation should be completed where applicable.
- PREVIOUS should return to the immediately preceding tab without submitting the declaration.
- NEXT should move to the immediately following tab and should preserve information already entered.
- Invalid, incomplete, or inconsistent declaration data should prevent successful final submission.
- Validation messages should clearly identify the field or section requiring correction.
- If Declaration Type is missing, the system should display a clear Validation Error and prevent the related operation.
- When multiple required fields are missing, the application may display a detailed validation list grouped by section.
- SAVE DRAFT should store the declaration without final submission and display a clear confirmation when successful.
- SUBMIT DECLARATION should perform final validation before submission.
- If validation fails, the declaration should remain available for correction and should not be treated as successfully submitted.
- Successful submission should provide a clear confirmation and update the declaration status in the TNP Declaration Management list.

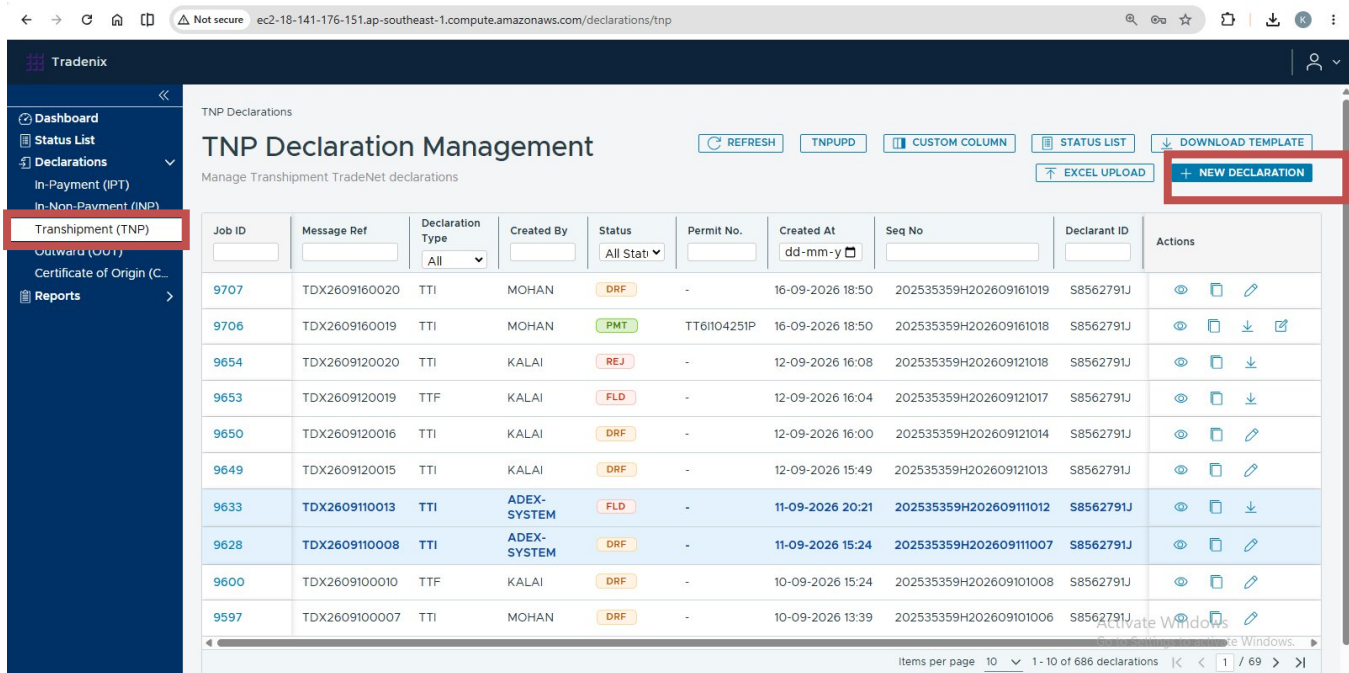

6. Suggested Transshipment Declaration Management Flow

1. Open Declarations → Transshipment (TNP).
2. Review the existing TNP declaration list or use the available filters to locate a declaration.
3. Select + NEW DECLARATION to create a new transshipment declaration.
4. Complete Shipment Info and enter all mandatory declaration and shipment details.
5. Use NEXT to proceed through Transport Info, Party Info, Items, CPC, and Summary. Use PREVIOUS to return to earlier tabs when corrections are required.
6. Complete inward and outward transport information, including applicable arrival/departure dates, ports, transport modes, destination, and container details.
7. Enter and verify all required party information.
8. Enter and verify the required item details, HS codes, packing information, quantities, UOMs, country of origin, transport references, and related item data.
9. Complete the applicable CPC options.
10. Review the Summary page, including package and weight totals, transport references, remarks, and declaration statement.
11. Use SAVE DRAFT when the declaration must be stored without final submission.
12. Select SUBMIT DECLARATION only after all required information is complete and correct.
13. If validation fails, review the validation message or detailed error list and correct each identified field.
14. After successful submission, verify the confirmation notification and confirm that the declaration appears in the TNP Declaration Management list with the appropriate status.

Appendix A - UI Reference

Step 1: Open TNP Declaration Management

From the left navigation menu, expand Declarations and select Transshipment (TNP). The TNP Declaration Management page displays existing transshipment declarations, filters, statuses, row-level actions, and list-level controls. Select + NEW DECLARATION to create a new TNP declaration.

The screenshot shows the Tradenix web application interface for TNP Declaration Management. The left sidebar contains a navigation menu with 'Declarations' expanded, showing 'In-Payment (IPT)', 'In-Non-Payment (INP)', 'Transshipment (TNP)' (highlighted), 'Outward (OOI)', 'Certificate of Origin (C...)', and 'Reports'. The main content area is titled 'TNP Declaration Management' and includes a table of declarations. The table has columns: Job ID, Message Ref, Declaration Type, Created By, Status, Permit No., Created At, Seq No, Declarant ID, and Actions. The table contains 10 rows of data. A '+ NEW DECLARATION' button is highlighted in the top right corner of the main area.

Figure 1. TNP Declaration Management - Add New Declaration

Step 2: Start a New TNP Declaration

The system opens the TNP declaration entry page at Shipment Info (S). Complete the mandatory declaration and shipment fields such as Declaration Type, Cargo Type, Inward Transport ID, Release Location, Receipt Location, and other applicable information.

Note: Shipment Info is the first workflow tab. Use NEXT to continue after completing the required fields.

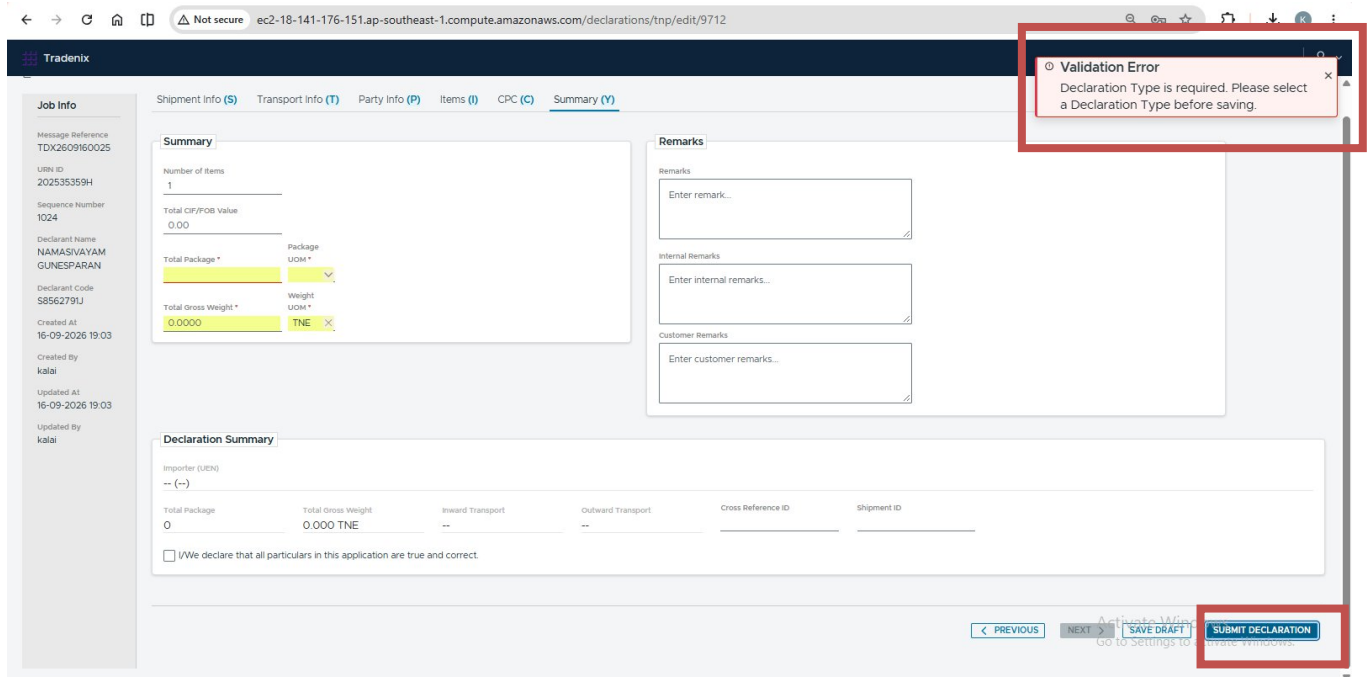

The screenshot shows the Tradenix web application interface for creating a new TNP Declaration. The browser address bar shows the URL: `ec2-18-141-176-151.ap-southeast-1.compute.amazonaws.com/declarations/tnp/edit/9712`. The page title is "TNP Declarations / Edit Declaration". The "Shipment Info (S)" tab is selected and highlighted with a red box. The left sidebar contains "Job Info" details: Message Reference TD2609160025, URN ID 202535359H, Sequence Number 1024, Declarant Name NAMASIVAYAM GUNESPARAN, Declarant Code S856279IJ, Created At 16-09-2026 19:03, Created By kalai, Updated At 16-09-2026 19:03, and Updated By kalai. The main form area is divided into sections: "Declaration Info" with fields for Declaration Type, Cargo Type, Inward Transport ID, Outward Transport ID, Release Location, Receipt Location, and Storage Location; "Prev Permit Number" with a Previous Permit Number field; "Checks" with a BG Indicator field; and checkboxes for License, Document, and Additional Recipients. An "EXIT DECLARATION" button is in the top right. A Windows watermark is visible in the bottom right corner.

Figure 2. New TNP Declaration - Shipment Info

Step 3: Validation Error - Missing Declaration Type

If Declaration Type is not selected, the system prevents the related operation and displays a Validation Error indicating that Declaration Type is required.

Note: Correct the Declaration Type before attempting the affected operation again.

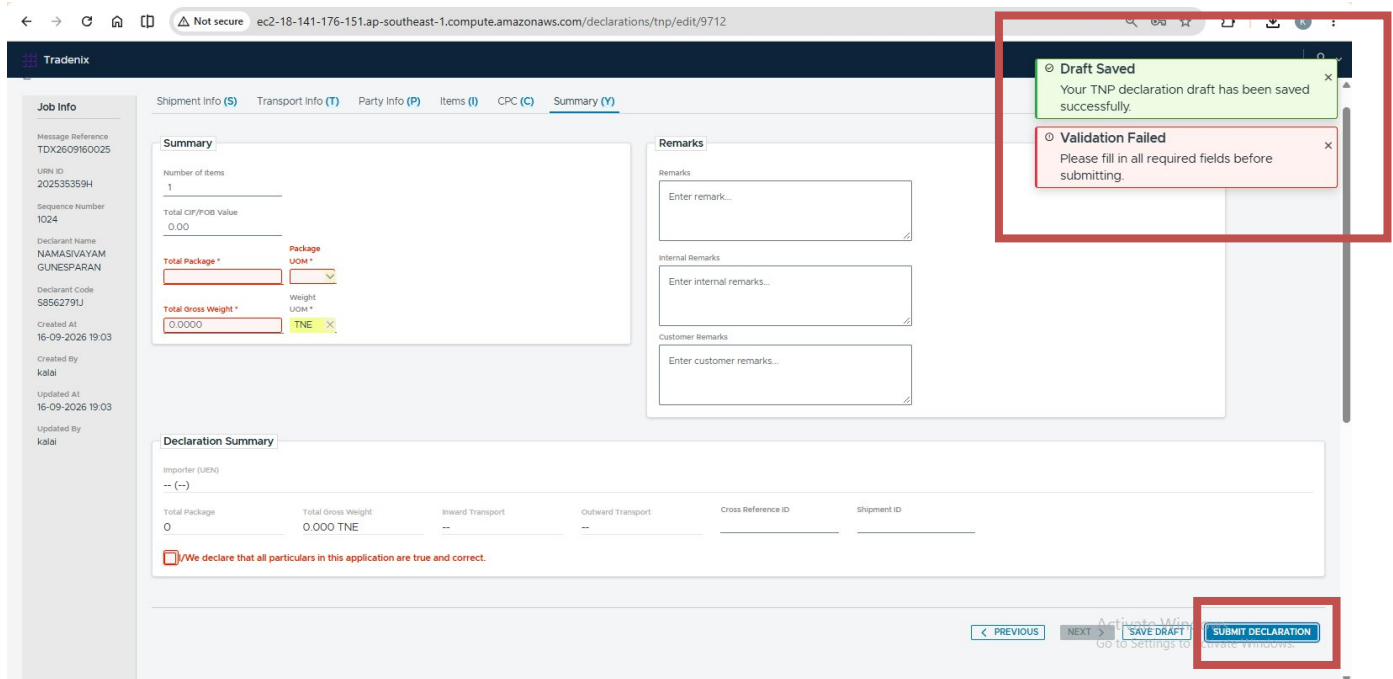

The screenshot shows the Tradenix TNP Declaration form. A red box highlights a validation error message in the top right corner: "Validation Error Declaration Type is required. Please select a Declaration Type before saving." The form includes sections for Job Info, Summary, Remarks, and Declaration Summary. The Summary section shows fields for Number of Items (1), Total CIF/FOB Value (0.00), Total Package (0.0000), and Weight (0.0000 TNE). The Declaration Summary section includes fields for Importer (UEN), Total Package (0), Total Gross Weight (0.000 TNE), Inward Transport, Outward Transport, Cross Reference ID, and Shipment ID. A checkbox at the bottom indicates "We declare that all particulars in this application are true and correct." The bottom right corner features buttons for PREVIOUS, NEXT, SAVE DRAFT, and SUBMIT DECLARATION. A red box highlights the SUBMIT DECLARATION button.

Figure 3. Validation Error - Declaration Type Required

Step 4: Validation Failed - Required Fields Incomplete

If required fields are incomplete, the system displays a Validation Failed message and highlights mandatory values that must be completed before submission.

Note: Complete the highlighted mandatory fields before attempting submission.

The screenshot shows the Tradenix TNP Declaration form. The 'Summary' tab is selected. The form contains several fields, some of which are highlighted in red to indicate they are mandatory and incomplete. These include 'Total Package', 'Total Gross Weight', and 'Package UOM'. A red box in the top right corner displays a 'Validation Failed' message: 'Please fill in all required fields before submitting.' A green box in the top right corner displays a 'Draft Saved' message: 'Your TNP declaration draft has been saved successfully.' The 'SUBMIT DECLARATION' button is highlighted in red.

Figure 4. Validation Failed - Required Fields Incomplete

Step 5: Review Detailed Validation Errors

When validation fails, the system may display a detailed list of missing information grouped by section, including Summary, Transport, Cargo, Item, and other validation errors. Correct each listed field before attempting submission again.

Note: Use the detailed validation list to identify all missing fields and return to the relevant tabs for correction.

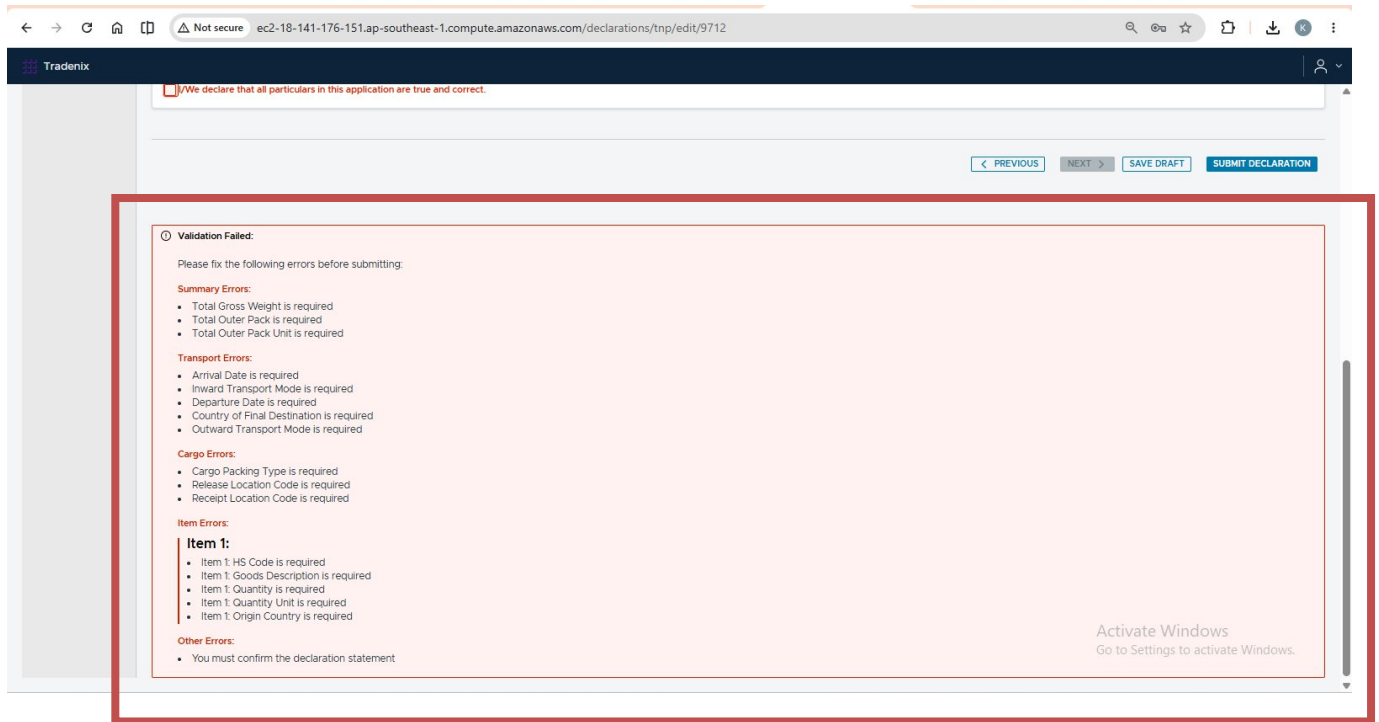

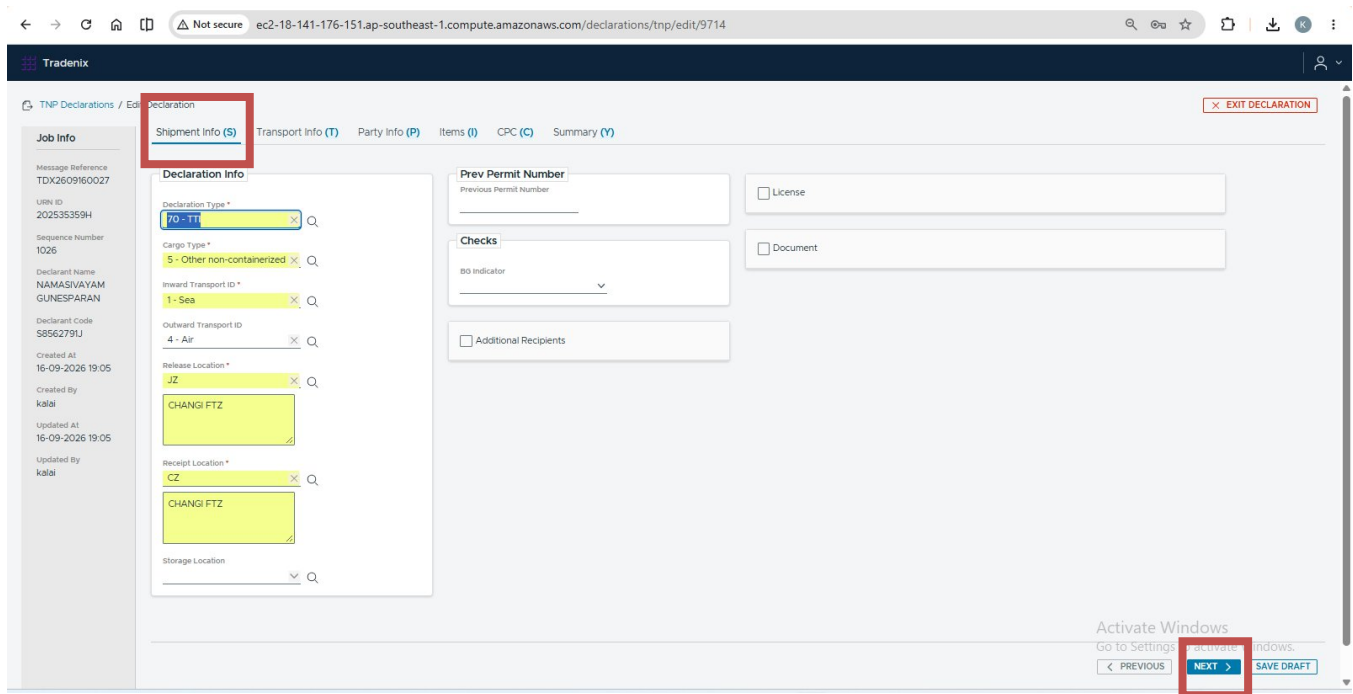

Figure 5. Detailed TNP Validation Errors

Step 6: Complete Shipment Information

Enter the required Shipment Info values for the transshipment declaration. The page may include Declaration Type, Cargo Type, Inward Transport ID, Outward Transport ID, Release Location, Receipt Location, Storage Location, Previous Permit Number, BG Indicator, License, Document, and Additional Recipients.

Note: Use NEXT to continue from Shipment Info to Transport Info.

The screenshot shows the Tradenix TNP Declaration form. The 'Shipment Info (S)' tab is selected and highlighted with a red box. The form contains the following fields:

- Job Info:** Message Reference (TDX2609160027), URN ID (202535359H), Sequence Number (1026), Declarant Name (NAMASIVAYAM GUNESPARAN), Declarant Code (9856279JU), Created At (16-09-2026 19:05), Created By (kalai), Updated At (16-09-2026 19:05), Updated By (kalai).
- Declaration Info:** Declaration Type * (70 - TT), Cargo Type * (5 - Other non-containerized), Inward Transport ID * (1 - Sea), Outward Transport ID (4 - Air), Release Location * (JZ), Receipt Location * (CZ), Storage Location.
- Prev Permit Number:** Previous Permit Number, License, Document.
- Checks:** BG Indicator, Additional Recipients.

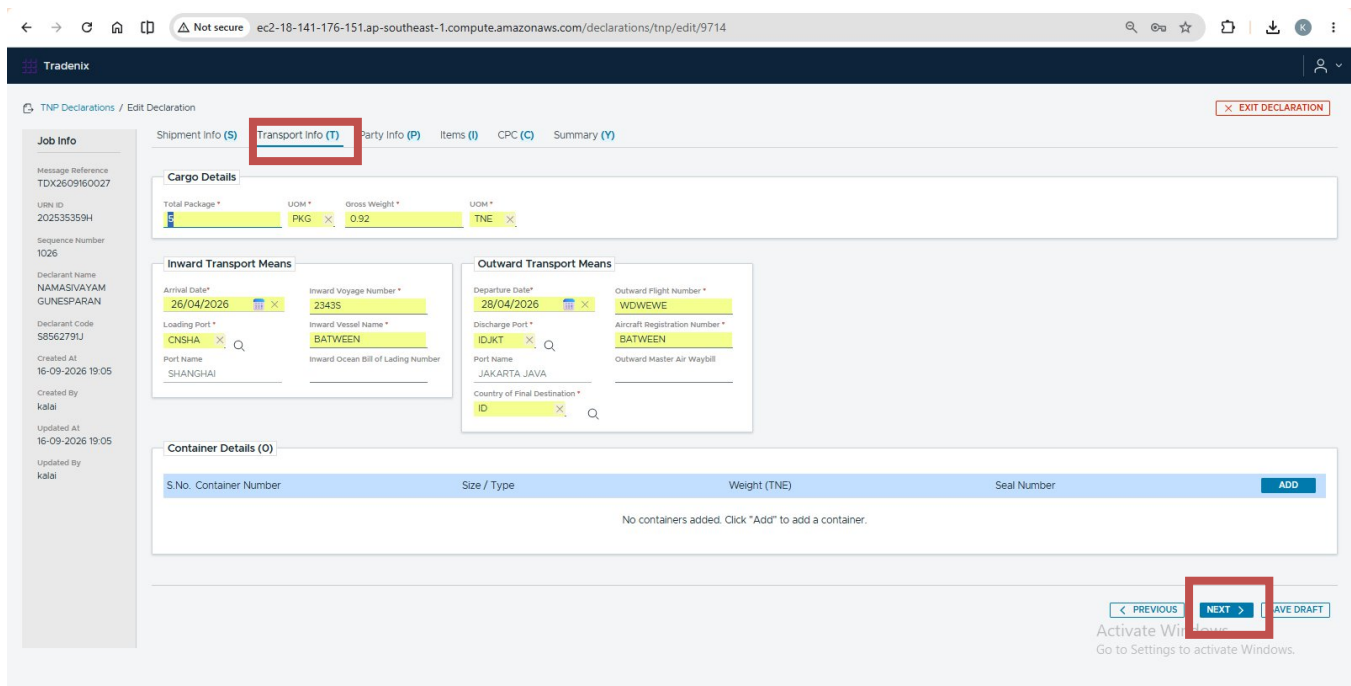

At the bottom right, there are buttons for 'PREVIOUS', 'NEXT', and 'SAVE DRAFT'. The 'NEXT' button is highlighted with a red box. An 'EXIT DECLARATION' button is also visible in the top right corner.

Figure 6. Completed TNP Shipment Information

Step 7: Complete Transport Information

Select Transport Info (T) or use NEXT from Shipment Info. Enter cargo details, inward transport details, outward transport details, departure and arrival information, ports, country of final destination, and container details where applicable.

Note: PREVIOUS returns to Shipment Info. NEXT proceeds to Party Info.

The screenshot displays the 'Edit Declaration' interface for a TNP Declaration. The 'Transport Info (T)' tab is active and highlighted with a red box. The page is divided into several sections:

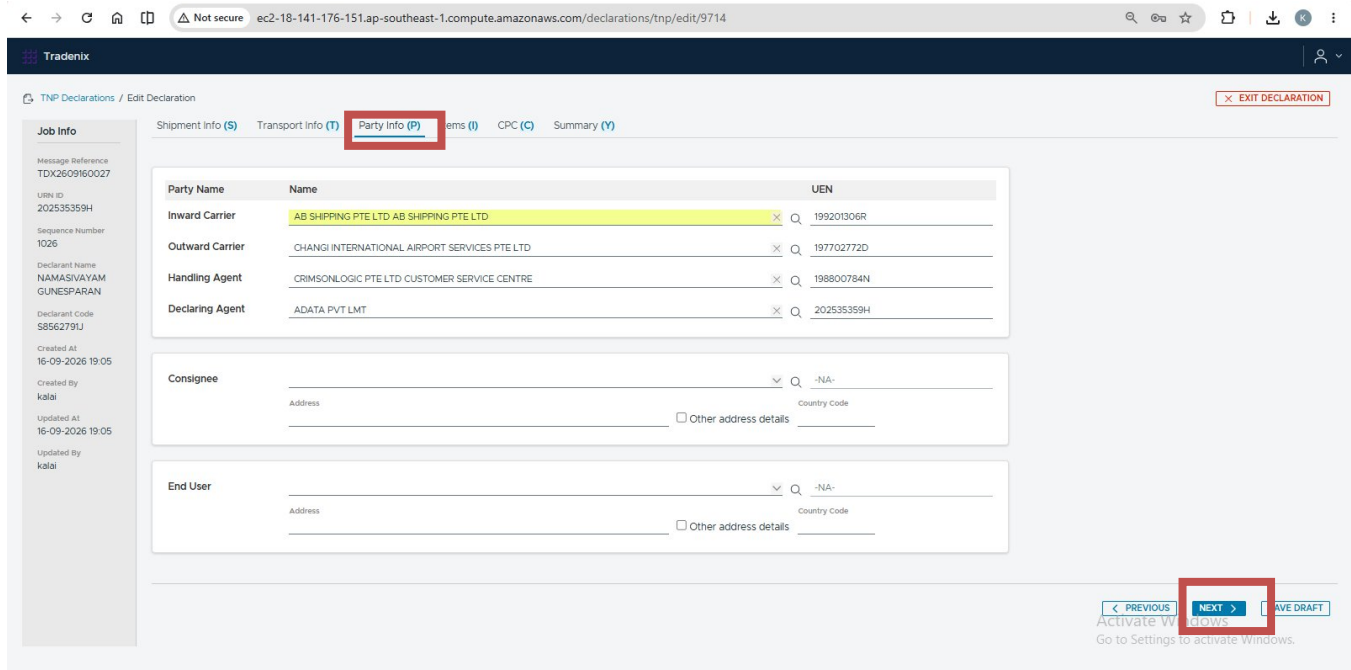

- Job Info:** A sidebar on the left containing details such as Message Reference (TDX2609160027), URN ID (202535359H), Sequence Number (1026), Declarant Name (NAMASVAYAM GUNESPARAN), Declarant Code (58562791J), Created At (16-09-2026 19:05), Created By (kalai), Updated At (16-09-2026 19:05), and Updated By (kalai).
- Navigation:** Tabs for Shipment Info (S), Transport Info (T), Party Info (P), Items (I), CPC (C), and Summary (Y) are visible at the top. 'Transport Info (T)' is selected.
- Cargo Details:** Fields for Total Package (PKG), UOM (TNE), Gross Weight (0.92), and UOM (TNE) are present.
- Inward Transport Means:** Fields for Arrival Date (26/04/2026), Inward Voyage Number (23435), Loading Port (CNSHA), Inward Vessel Name (BETWEEN), Port Name (SHANGHAI), and Inward Ocean Bill of Lading Number.
- Outward Transport Means:** Fields for Departure Date (28/04/2026), Outward Flight Number (WDWEWE), Discharge Port (IDJKT), Aircraft Registration Number (BETWEEN), Port Name (JAKARTA JAVA), and Outward Master Air Waybill.
- Container Details (0):** A table with columns for S.No., Container Number, Size / Type, Weight (TNE), and Seal Number. An 'ADD' button is at the end of the table. Below the table, it states 'No containers added. Click "Add" to add a container.'
- Navigation Buttons:** At the bottom right, there are buttons for '< PREVIOUS', 'NEXT >', and 'SAVE DRAFT'. The 'NEXT >' button is highlighted with a red box.

Figure 7. TNP Transport Information

Step 8: Complete Party Information

Select Party Info (P) or use NEXT from Transport Info. Enter or verify the parties involved in the transshipment declaration, such as Inward Carrier, Outward Carrier, Handling Agent, Declaring Agent, Consignee, and End User where applicable.

Note: PREVIOUS returns to Transport Info. NEXT proceeds to Items.

Step 9: Complete Item Information

Select Items (I) or use NEXT from Party Info. Enter the required item information, including inward and outward HAWB/HUCR/HBL references, HS Code, description, brand, country of origin, packing details, quantity, UOM, item value, CASC details, tariff and lot identification, and shipping marks as applicable.

Note: PREVIOUS returns to Party Info. NEXT proceeds to CPC.

The screenshot shows the 'Items' tab in the Tradenix TNP Declaration system. The 'Items' tab is highlighted with a red box. The form contains several sections:

- Item Details:** Includes fields for S No., Inward HAWB/HUCR/HBL Number, Outward HAWB/HUCR/HBL Number, HS Code, HS Type, HS Description, Brand, and Country of Origin.
- CASC Details:** Includes a table for Product Code, Quantity, and UOM, and checkboxes for Tariff & Lot Identification and Shipping Marks.
- Packing Details:** Includes fields for Outer Pack Qty, UOM, In Pack Qty, UOM, Inner Pack Qty, UOM, and Innermost Pack Qty, UOM.
- Item Quantity & value:** Includes checkboxes for Other Quantity Fields, HS Quantity, UOM, Item Value, and Exchange Rate.

The 'NEXT' button is highlighted with a red box.

Figure 9. TNP Item Information

Step 10: Complete CPC Information

Select CPC (C) or use NEXT from Items. Select the applicable CPC-related options such as AEO, CWC, SEASTORE, STS, STS & CWC, or International Permit Exchange.

Note: PREVIOUS returns to Items. NEXT proceeds to Summary.

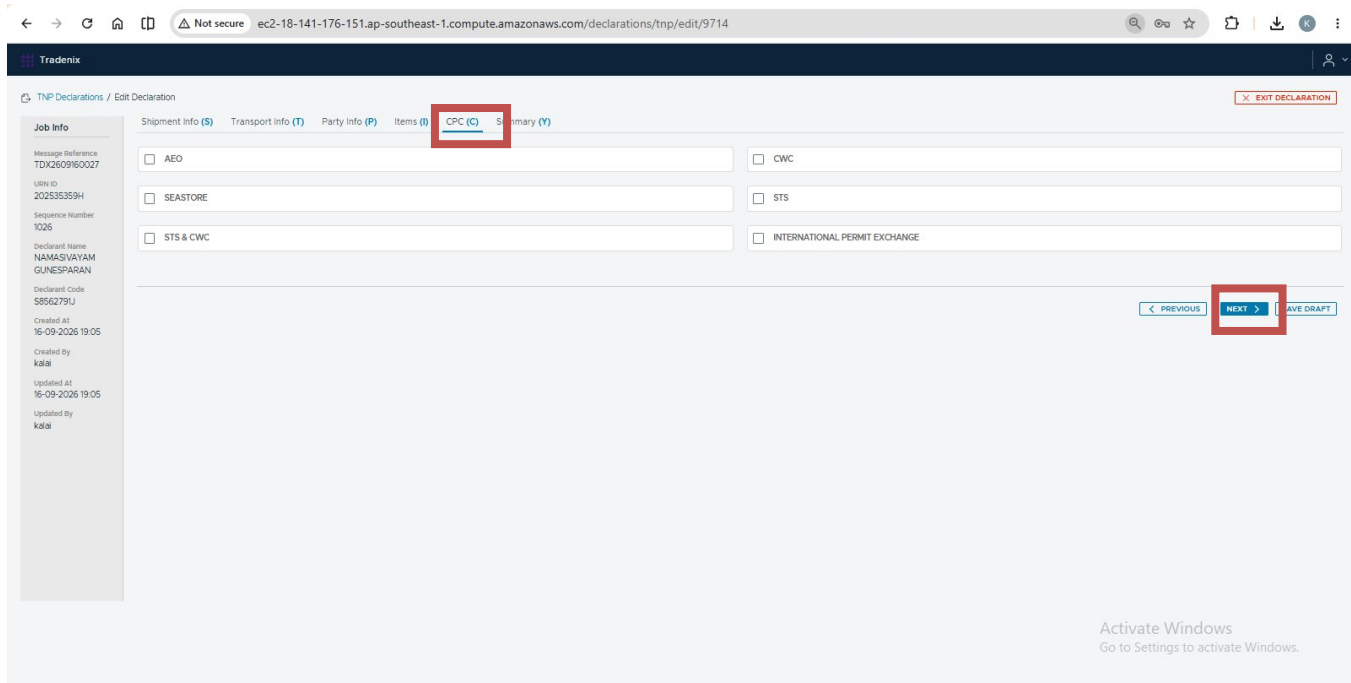

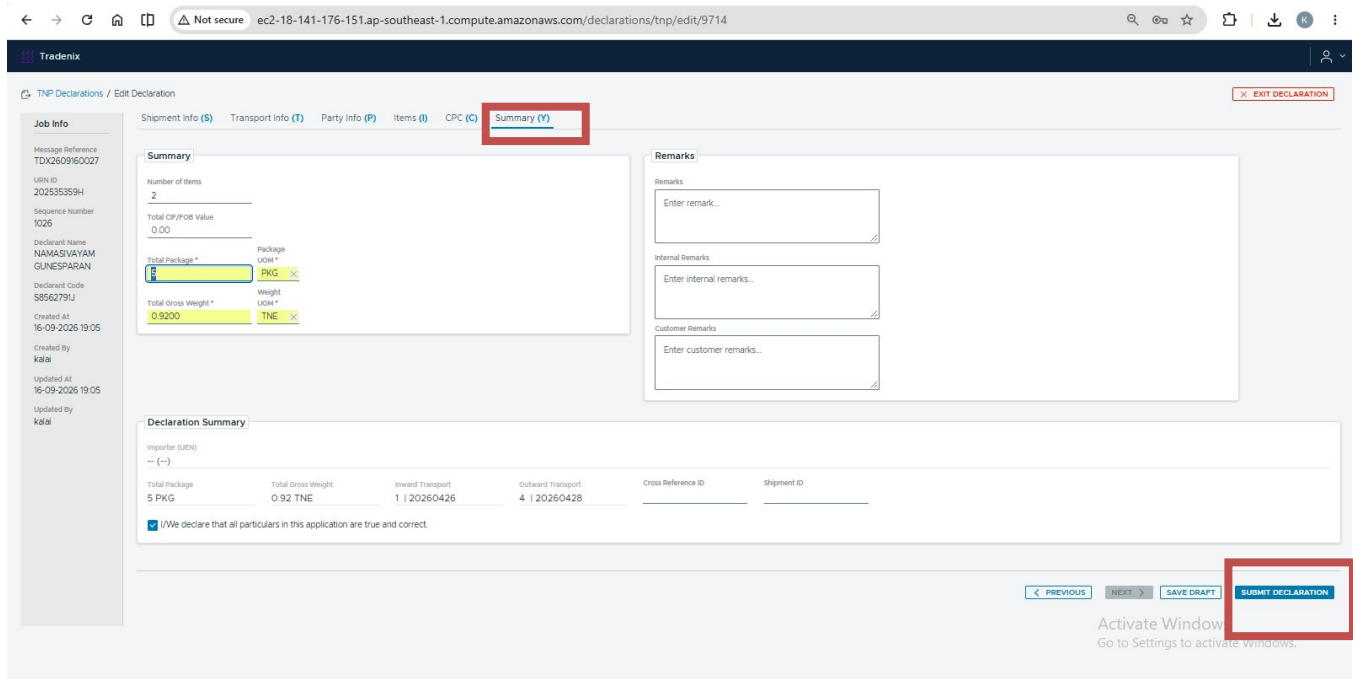

Figure 10. TNP CPC Information

Step 11: Review the Declaration Summary

Select Summary (Y) or use NEXT from CPC. Review the number of items, total CIF/FOB value, total package and package UOM, total gross weight and weight UOM, transport references, remarks, and declaration statement. Confirm that the declaration particulars are true and correct before final submission.

Note: PREVIOUS returns to CPC. Summary is the final tab; review all information before using SAVE DRAFT or SUBMIT DECLARATION.

Step 12: Save and Submit the TNP Declaration

Use SAVE DRAFT when the declaration must be saved without final submission. When all required information is complete, select SUBMIT DECLARATION. After successful processing, the system returns to the TNP Declaration Management page and displays confirmation notifications such as Draft Saved and Declaration Submitted.

Note: SAVE DRAFT stores the declaration without final submission. SUBMIT DECLARATION performs final validation and submission.

The screenshot shows the Tradenix TNP Declaration Management interface. A table lists various declarations with columns for Job ID, Message Ref, Declaration Type, Created By, Status, Permit No., Created At, Seq No, Declarant ID, and Port Code. Two notifications are visible in the top right corner, indicating successful actions.
